

## **Operational Context**

Djibouti is the least developed and most food deficit country in the Horn of Africa. The country has some of the worst social indicators in the world; 42 percent of the population lives in absolute poverty with 83 percent of those living in rural areas. Life expectancy is at 53 years.

The climate is hot and dry, desert-like arid, characterized by less than 200 mm of rainfall per year which hinders agricultural production, which accounts for only 3 percent of Gross Domestic Product (GDP). The country compensates the gap by importing 90 percent of its food commodities which makes the country highly dependent on international market prices. Any variation in the international prices has a considerable impact on the poorest segment of the population, who spend 77 percent of their household budget on food.

WFP's operations in Djibouti are aligned with the 2035 vision, which promotes a food security and nutrition strategy under the pillar "Strengthening Human Capital".

WFP has been in Djibouti since 1978.

# **In Numbers**

275.3 mt of food assistance distributed

US\$ 110, 000 cash based transfers made

**US\$ 11.5 m** six months (May – October 2018) net funding requirements

**43,900 people Assisted** in April 2018

## **Operational Updates**

- Djibouti is hosting approximately 26,300 refugees from Somalia, Yemen, Eritrea and Ethiopia, of which 21,100 reside in camps. WFP provided assistance to all registered refugees and asylum seekers living in Ali Addeh, Holl Holl and Markazi camps in form of general distributions, nutrition support, take home rations for school girls to encourage school attendance, and a cash transfer component as part of the general distribution. Cash transfers have contributed to the diversification of refugees' diet, increase in purchasing power and enhancement of local markets.
- In April 2018, WFP provided food assistance to 43,900 people including refugees, asylum seekers, vulnerable local households and school children in rural and urban areas. WFP provided food assistance to rural and urban food insecure households affected by drought in the form of general rations. Nutrition interventions are also ongoing for the prevention and treatment of moderate acute malnutrition, for people living with HIV/AIDS and those on tuberculosis treatment.
- According to FEWSNET, rainfall during the March to June Diraac/Sougoum rainy season has been average to slightly above average despite minimal rainfall in April. This has restored pasture and water resources in all areas and vegetation conditions are near average in the Southeast Pastoral Border livelihood zone and areas north of Obock City, though, rangeland conditions are lower than last year.

# WFP Country Strategy Country Strategic Plan (2018-2019) 26.9 m 4.94 m 11.5 m **Strategic Result 1:** Everyone has access to food (SDG Target 2.1) **Strategic Outcome 1:** Refugees and asylum seekers living in camps in the Republic of Djibouti have access to adequate and nutritious food all year long; Focus area: Crisis Response **Strategic Outcome 2:** Djiboutian vulnerable population including children 6-59 months, pregnant and lactating women and girls and Antiretroviral Therapy and Tuberculosis/Directly Observed Treatment clients' nutritional status have an improved nutritional status all year long; Focus area: Resilience Building **Strategic Outcome 3:** Food insecure Djiboutian rural and urban populations in targeted regions and neighbourhoods have improved access to food by 2019; Strategic Result **2** - No one suffers from malnutrition (SDG Target 2.2) **Strategic Outcome 4:** School-aged children in rural Djibouti have access to Focus area: Resilience Building Strategic Result 8 - Sharing of knowledge, expertise and technology, strengthen global partnership support to country efforts to achieve the SDGs Strategic Outcome 5: The humanitarian community in the Horn of Africa receives, on request, expertise, services and infrastructure in the area of supply chain throughout the year.

### **WFP Country Activities**

SO 1	Refugees and asylum seekers living in camps in the Republic of Djibouti have access to adequate and nutritious food all year long;
SO 2	Djiboutian vulnerable population including children 6-59 months, pregnant and lactating women and girls and Antiretroviral Therapy and Tuberculosis/Directly Observed Treatment clients' nutritional status have an improved nutritional status all year long;
SO 3	Food insecure Djiboutian rural and urban populations in targeted regions and neighborhoods have improved access to food by 2019;
SO 4	School-aged children in rural Djibouti have access to nutritious meals throughout the school year;
SO 5	The humanitarian community in the Horn of Africa receives, on request, expertise, services and infrastructure in supply chain throughout the year.

### **Monitoring**

Monitoring coverage: WFP continued to monitor program implementation to ensure accountability, transparency and efficiency in delivering assistance. In April, 57 percent of the planned monthly monitoring plan was achieved. People receiving cash assistance were interviewed through post distribution household surveys to gather information on: their views about the program, delivery mechanisms, utilization of cash transfers and data on gender, protection and accountability to affected populations.

#### **Challenges**

The deteriorating food security in some neighboring countries could trigger population movement in Djibouti.

Given the resource constraints, WFP is prioritizing the food distributions for the refugees and nutrition interventions for refugees.

WFP requires additional resources to be able to respond to the increasing needs among refugees as well as the host community population who are food insecure.

#### **Donors**

USA, Japan, European Commission, Multilateral, UNCERF and Canada.
