CHANGING HOW WE PLAN AND IMPLEMENT TO ACHIEVE  
THE SUSTAINABLE DEVELOPMENT GOALS

With the approval of the Sustainable Development Goals (SDGs) in 2015, the international community set the course for development priorities until 2030. They seek to eradicate hunger and poverty in all its forms through a focus on partnerships. Within the broader framework of the SDGs, WFP's central focus is SDG2, to end hunger achieve food security and improved nutrition and promote sustainable agriculture. To accomplish this ambitious goal, WFP is updating the way it plans implements, manages and reports its programmes.

## How have we changed?

WFP is the first United Nations agency to align its corporate strategy (2017- 2021) with the Sustainable Development Goals, showing how it contributes to and supports governments to achieve them.

**ENHANCING  
GOVERNMENT  
INSTITUTIONS, SYSTEMS  
AND PROGRAMMES IS AT  
THE CORE OF WFP  
STRATEGY**

At the country level, WFP has adopted a new corporate architecture comprised of a holistic Country Strategic Plan which replaces current programme categories and will define WFP's humanitarian and development assistance. The CSP combines the financial framework and the Results framework and simplifies the implementation of programmes at the country level. This approach will transform our business model to confront the realities of the SDGs by improving the designing of effective programmes, delivering outcomes more efficiently and reporting convincingly to stakeholders.

## How does this affects Namibia?

WFP has shifted from operational support to technical assistance and capacity-strengthening with Government taking a leadership role and ownership of the programme. The core of WFP strategy in Namibia is to strengthen country systems and capacities to achieve zero hunger.

## OUR VISION IN NAMIBIA: STRENGTHEN GOVERNMENT CAPACITIES TO ASSESS, PLAN AND RESPOND TO FOOD SECURITY NEEDS AND PROMOTE THE ACHIEVEMENT OF ZERO HUNGER

The changes WFP aims to contribute in order to deliver on Sustainable Development Goals (SDG) 2 and 17 include strengthening:

- ◆ the management of the national emergency relief safety net programmes to effectively meet the food and nutrition needs of vulnerable people all year round. (WFP Strategic Result 1 - Access to food); and
- ◆ government assessment and analysis capacity for improved policy and programme formulation. (WFP Strategic Result 5 – countries have strengthened capacity to implement the SDGs).

In Namibia, WFP will support work for the achievement of SDG targets 2.1 for food access and 17.9 for capacity strengthening through two strategic outcomes which include activities corresponding to government priorities and; WFP's experience and expertise. It will also continue to:

- i) provide demand-driven support for the enhancement of national systems and programmes;
- ii) generate evidence to inform policy dialogue and reform and programme design and implementation;
- iii) support coordination and advocacy;
- iv) promote and facilitate South–South and triangular cooperation; and
- v) strengthen individual capacities through training and other modalities.

The ultimate objective of WFP's work in Namibia is to enable national institutions to absorb sufficient capacity to take over from WFP in sustainably ending hunger and improving nutrition for every woman, man, girl and boy in Namibia.

# WFP Namibia Country Strategic Plan (2017-2022)

<b>SDG Target</b>	<b>SDG 2.1</b> <b>End hunger and ensure access to food</b>	<b>SDG 17.9</b> <b>Capacity strengthening</b>
