

Highlights:

o In Ar-Raqqa city bread prices are higher by more than 100 percent for public and commercial compared to average prices in Damascus market.

o Poor market functionality and low food supply resulted in three percent increase in the total cost of standard food basket in rural Deir-ez-Zor markets.

o In besieged Deir-ez-Zor market the average retail prices are higher by 19 percent for rice and 150 percent for bulgur compared to average prices of these commodities in Damascus markets.

o Slight increase in ToT of sheep price and casual labours daily wage against wheat flour price during reporting month.

A: Standard Food Basket

In July 2017, the national average cost of a standard food basket¹ (group of essential food commodities) was SYP 32,770. This shows downward trends of one percent compared to last month, nine percent compared to six months ago and six percent compared to corresponding month last year.

The market price data of July 2017 indicates that the highest cost of food basket was in Deir-ez-Zor governorate at SYP 57,550 while the lowest was recorded in Al-Hasakeh at SYP 26,165.

Since December 2016, gradual decline in food prices was observed in most of the monitored markets. The decreased was mainly noted in the prices of pulses, oil and sugar. However, in Deir-ez-Zor governorate an increase of four percent observed, compared to last month. This is in-line with the escalated offensive in Ar-Raqqa that cuts most of the supply routes to rural Deir-ez-Zor leading to low food supplies to markets and severe shortage in many commodities.

Consequently, food access of trapped populations in Ar-Raqqa city and rural Deir-ez-Zor has been negatively impacted. This may increase further the already dire food security situation of poor households who are unable to meet their minimum food requirements.

In Eastern Ghouta food prices have slightly improved and the households have better access to nutritious and healthy food.

1.The cost of a standard basket of dry goods providing 1,930 kcal a day for a family of five during a month. The basket includes 37 kg of bread, 19 kg rice, 19 kg lentils, 5 kg of sugar, and 7 kg of vegetable oil.

B: Retail Prices

1- Wheat Flour, Rice and Bulgur:

The improved security situation in some besieged and hard-to-reach areas has positively impacted supply routes functionality leading to better food availability and prices in many markets across the country.

During July, at national level one kg of wheat flour sold at SYP 259, rice at SYP 526 and bulgur at SYP 297. Compared to June, prices of wheat flour and bulgur remained unchanged while rice went up by one percent. Compared to six months ago level average prices decreased by three percent for wheat flour, five percent for rice and six percent for bulgur. However, compared to corresponding month of last year, prices have slightly increased by three percent for wheat flour, two percent for rice while bulgur remained the same.

Deir-ez-Zor markets continue to record highest prices for wheat flour SYP 390/kg, rice SYP 800/kg and bulgur SYP 700/kg.

On the other hand, the lowest prices were reported from Quneitra for wheat flour SYP 205/kg, As-Sweida for rice SYP 325/kg while Dar'a recorded the lowest price for bulgur for SYP 200/kg.

During reporting month, the average retail price of rice was higher by 19 percent in hard-to-reach markets and 4 percent in besieged Deir-ez-Zor markets when compared to accessible markets average. Moreover, bulgur is 150 percent higher in besieged Deir-ez-Zor markets compared to accessible markets average.

Food security situation continues to be challenging in Ar-Raqqa city and rural Deir-ez-Zor where market functionality has been negatively impacted by conflict.

2– Bread:

In July 2017, the average nominal retail prices for public (subsidized) bread and commercial (shop) bread were SYP 80/bundle and SYP 135/bundle, respectively. Market price monitoring data indicates relatively stable prices for both public and commercial bread compared to last month with less than one percent change.

Between January and July 2017, the average retail prices of public bread went up by two percent while it declined by six percent for commercial bread.

Year-on-year, public bread decreased by six percent while shop bread increased by three percent.

Across all main monitored markets, Idleb continued to record the highest price for public and commercial bread at SYP 275/bundle and SYP 300/bundle, respectively. Tartous market recorded the lowest price for commercial bread at SYP 65/bundle.

In Ar-Raqqa city market, the bread price was higher by 113 percent for public and 43 percent for commercial compared to average prices in accessible markets.

In hard-to-reach markets the bread price was higher by 107 percent for public and 51 percent for commercial bread compared to accessible market average.

Source: WFP Field Offices

3– Diesel and cylinder of butane gas

In July 2017, the average price of diesel was SYP 335/L and SYP 4,425 for a cylinder of butane gas. Between January and July 2017, the average retail prices of diesel went up by one percent while a cylinder of butane gas decreased by five percent. Compared to July 2016, prices went down by 14 percent for diesel and four percent for butane gas.

During the reporting month, the highest price for diesel and butane gas was observed in Deir-ez-Zor markets at SYP 1,120/L and SYP 9,250, respectively. The lowest cost for diesel was reported from Al-Hasakeh, SYP 95/L.

The price of diesel was 5 times higher in besieged markets of Deir-ez-Zor compared to the national average.

The average price of butane gas was higher by 18 percent in hard to reach markets and 171 percent in besieged markets of Deir-ez-Zor compared to national average level.

Consequently, this will add a higher cost on transportation and will further exert extra pressure on food prices in besieged and hard to reach markets.

C. Wholesale Prices of Main Cereal in Damascus Market

During the reporting month, the average nominal wholesale price of cereal was SYP 6,575/25 kg for wheat grain, SYP 5,675/25 kg for bulgur and SYP 11,500/25 kg for rice.

The wholesale prices remain stable compared to June 2017 level. But, between January and July 2017, significant decreases were recorded of 10 percent for rice, 21 percent for bulgur and 18 percent for wheat.

Year-on-year, the wholesale price also declined by 14 percent for white rice, 18 percent for wheat grain and 20 percent for bulgur.

D. Food Supply to Markets

During July, poor food supply has been reported from rural Deir-ez-Zor and Ar-Raqqa city due to conflict that has severely disrupted supply routes to these markets. As a result, access to food has been negatively impacted in-line with declining food stocks in markets.

Following the cease-fire agreement in eastern Ghouta, food availability in markets has notably improved and many commercial trucks entered to the besieged community. However the prices are still high and considered to be unaffordable for many poor, besieged households that have poor and unstable income sources.

Markets continue to be functional with normal commercial flow in accessible areas including Damascus, Tartous, Lattakia, Hama and As-Sweida.

E. Terms of Trade (TOT):²

TOT between wage labour and wheat flour

The national average daily wage rate during the reporting period was SYP 1,700. The trends for purchasing power (measured by terms of trade) of casual labours remains weak across all monitored markets in the country.

In July 2017 on national average for a whole day of work a casual labour could only buy 6.6 kg of wheat flour/day, which represents a slight increase of three percent compared to June, 28 percent compared to six months ago and 29 percent compared to corresponding month last year.

Key informants reported that despite the slight increase in daily wage rates, job opportunities remain limited and temporary, mainly in agriculture sectors. Moreover, the situation considered to be more challenging for female and child casual labours that their engagement in labouring market has significantly increased during conflict.

TOT between sheep and wheat flour

During July, the national average price of a two-year old male sheep was SYP 114,135/head. This shows an increase of four percent compared to last month, 32 percent compared to six months ago and 27 percent compared to same month last year.

The national average TOT between a sheep and wheat flour was 441kg/sheep, which is higher by four percent compared to last month and 43 percent compared to the January 2017 levels.

F. International Market Prices

The FAO Food Price Index averaged 179 points in July 2017, up by two percent compared to last month's average and ten percent compared to same month last year.

The Cereal Price Index averaged 162 points in this month, up by five percent compared to June level and ten percent compared to corresponding month of last year.

In July 2017, the wheat prices on local markets averaged USD 511/MT, which is still more than two times higher than the price of wheat in the international market (USD 202/MT).

2. The TOT are proxy indicators of the purchasing power of households that rely on livestock and/or casual labour as their main source of income for the purchase of cereals from local markets. TOT are important components of food security analysis. Changes in the terms of trade between wages/livestock and staple food commodities are indicative of the trends in purchasing power and the impact on the food security situation of households dependent on food purchases through income from daily wage labour and/or the sale of livestock.
