In Numbers

- **317,000** refugees living in camps in Tanzania
- **70,000** smallholder farmers to be assisted through Farm to Market Alliance
- **29,000** pregnant and nursing women and children under the age of two supported with food distributions and nutrition sensitization

US$21.6 m six months (January-June 2018) net funding requirements

51% Women 49% Men

WFP Tanzania Country Brief

March 2018

**Operational Context**

Tanzania is food self-sufficient at the national level. However, 80 percent of the population relies on subsistence farming and 28 percent of the population lives below the poverty line. Localised food deficits occur at regional, district and household levels mainly due to dependence on rain-fed agriculture and limited use of modern farming techniques. Over the last three years, Tanzania's economy has grown at a rate of 7 percent annually, driven mainly by telecommunications, financial services, transport and construction. The discovery of large reserves of natural gas and crude oil offers promise of a new and significant revenue stream for the Tanzanian economy. WFP has been present in Tanzania since 1963.

**Operational Updates**

- **Refugees:** Rations are currently being distributed at 76 percent of the recommended 2,100 kcal per person per day. WFP is actively raising funds with the aim to return to full rations as prolonged rations reductions have far-reaching and potentially life-altering consequences for refugees. US$ 40 million is urgently required for the next six months through September 2018.

- **Nutrition:** WFP conducted a training (05-08 March) for nutrition stakeholders in the refugee camps. The training was designed to strengthen capacities in beneficiary targeting, project performance monitoring and evidence-based reporting on supplementary feeding programmes implemented to address stunting and moderate acute malnutrition. Stakeholders in attendance included government, cooperating partners and UNHCR.

- **WFP began registering beneficiaries in SCOPE under the Boresha Lishe nutrition project to strengthen data management. SCOPE enables WFP to digitally track beneficiary attendance and food distribution. Some 30,000 beneficiaries are expected to be registered by end of June 2018.**

- **Innovation:** WFP with Aga Khan Foundation and ColdHubs, a Nigerian start-up, is piloting a solar powered refrigeration centre in Mtwara. Construction of the ColdHub will begin in April. More information on ColdHubs can be found on the WFP Innovation Accelerator website: [http://innovation.wfp.org/project/coldhubs](http://innovation.wfp.org/project/coldhubs)

- **Smallholder Farmers:** Under the Farm to Market Alliance, preparations are being made to train 15,000 new farmers in the southern region on post-harvest handling and storage from April through June 2018. WFP is working to identify smallholder farmer groups from refugee hosting communities to support under agriculture component of Kigoma Joint Programme. WFP aims to reach 5,000 farmers this season.

Population: 53.5 million

2015 Human Development Index: 151 out of 188

Income Level: Lower

Chronic malnutrition: 34.7% of children between 6-59 months

WFP Country Activities

**Support to Refugees:** Tanzania currently hosts almost 317,000 Congolese and Burundian refugees at Nyarugusu, Nduata and Mtendeli Refugee Camps in Kigoma region. WFP provides a food basket of cereals, SuperCereal (fortified blended food), pulses, vegetable oil and salt to each refugee. WFP assistance is the main source of food for refugees.

SO 1

WFP also runs a Supplementary Feeding Programme in all three camps to provide additional nutrition support to pregnant and lactating women, children under five years, people with HIV/AIDS and hospital in-patients. In addition, hot meals are served to newly arriving refugees at transit and reception centres, and high energy biscuits provided to those in transit.

**Nutrition:** To prevent stunting, pregnant and breastfeeding mothers and children under two years receive a monthly take home ration of SuperCereal under the Mother and Child Health Nutrition programme, implemented in Dodoma and Singida regions. The communities also receive support to improve diet diversification through production of diversified crops and behaviour change communication.

SO 2

Under the Maisha Bora project, the construction of rainwater harvesting tanks and the provision of inputs for school and community gardens helps to improve the food security in the districts of Longido and Simanjiro in northern Tanzania. WFP also supports the Government to accelerate implementation of the National Multi-sectoral Nutrition Action Plan (NMNAP) by improving data collection and capacity through a catalyst team which facilitates multi-sector collaboration at the district level.

**Support to Smallholder Farmers:** Through its Market Access initiative, WFP helps farmers transition from subsistence farming to market-oriented agriculture by connecting the demand for crops with commercial markets and by providing access finance and fair contracts before planting. WFP supports farmers with the means to improve their yields and reduce post-harvest losses, increasing household income while reducing food insecurity at the community, national and global level.

SO 3

**Support to Government and Service Provision:** WFP works with the Government through the Tanzania Social Action Fund (TASAF) to push forward the social safety net programmes including seasonal livelihood programming and public works projects.

SO 4

WFP provides information to Government, private sector, NGOs and UN agencies to help improve efficiency in transport and logistics. WFP also provides common ICT services to 21 UN agencies operating in Dar es Salaam under the One UN initiative.

**Innovation Field Hub:** In partnership with WFP’s Munich Innovation Accelerator, WFP Tanzania is developing its function as an Innovation Field Hub for testing and scaling up of innovations from WFP and both the public and private sector.

SO 5

Monitoring

**Annual Report:** WFP Tanzania released its Annual Country Report (ACR). The report contains the narrative and financials for all WFP activities conducted in 2017 and can be found on the following link:

**Challenges**

**Refugees:** Chronic funding shortfalls have led to rations for general food distributions being distributed to only 76 percent of the recommended kilocalories. The table below provides shortfalls over the coming 3, 6 and 12 months based on WFP’s planning figure for the Refugee Operation.

**Strategic Partnerships**

WFP is part of a consortium of actors who provide support to refugees residing in refugee camps in Tanzania. WFP's co-operating partners include; World Vision Tanzania, Relief to Development Society (REDESO), Tanzania Red Cross Society, Danish Refugee Council, Caritas, Norwegian Refugee Council (NRC) and Médecins Sans Frontières.

WFP works with several line ministries and has formal partnerships with NGOs and local government authorities at the district level. Partners include: CEFA Tanzania Registered Trustees, Childreach Tanzania, Building Rural Income Through Enterprises (BRIJTEN), Rural Urban Development Initiative (RUDI), Private Agricultural Sector Support (PASS), Good Neighbours Tanzania, Norwegian Church Aid (NCA) and Agricultural Cooperative Development International and Volunteers in Overseas Cooperative Assistance (ACDI/VOCA), Save the Children and the district councils of: Kwimba, Misungwi, Magu, Nzega, Igunga, Chamwino, Singida Rural District Council, Bahi, Ikungi and Bunda.

**Kigoma Joint Programme:** A UN Joint Programme has been developed by the WFP-led Resilience Thematic Results Group (TRG) under the United Nations Development Assistance Plan (UNDAP II). The programme, involving 16 UN agencies, targets refugee host communities in three districts. WFP is leading the agriculture sub-component.

**Donors (2017/18)**

Belgium, Canada, Denmark, European Union, France, Republic of Korea, One UN, USA, Germany, UK, Ireland, Global Learning XPRIZE and Sweden.
