Operational Context

Efforts to reach a peaceful conclusion to the conflict in Libya continue amidst persisting political instability and a volatile security situation. Unrest since 2011 has caused the economic and humanitarian situation in the country to deteriorate significantly. Ongoing violence between multiple factions further aggravates an unstable environment, with ongoing political rivalries and violent struggles within the country.

WFP resumed operations in Libya in September 2014. WFP’s General Food Assistance (GFA) is comprised of in-kind food assistance provision. Each family receives two food parcels, enough to support five people for one month. The parcels consist of rice, pasta, wheat flour, white beans, vegetable oil, sugar and tomato paste. In 2019, WFP plans to reach 147,000 people in need every month. WFP is increasingly engaging across the humanitarian-development-peace nexus to support the review and rehabilitation of pre-crisis social protection systems. This will be crucial in a post-conflict scenario to ensure social cohesion.

WFP co-leads the Food Security Sector in Libya, leads the Logistics Sector, the Emergency Telecommunications Sector, and manages the UN Humanitarian Air Service (UNHAS) and the UN Hub in Benghazi.

Operational Updates

- In December 2019, WFP reached approximately 23,570 people in need through its regular food distributions in Libya.
- As part of the joint initiative between the four UN agencies (IOM, UNFPA, UNICEF, and WFP) WFP, under the Rapid Response Mechanism (RRM), is providing emergency food assistance to displaced families in and around Tripoli. Since the inception of the RRM in April 2019, WFP reached 32,975 people in need.
- In December, WFP through IOM’s Migrant Resource and Relief Mechanism (MRRM) distributed Ready to Eat food rations (composed of canned fish, canned beans, canned hummus, halawa and date bars) and reached 3,976 migrants and refugees in Urban areas.
- WFP’s School Feeding programme conducted in conjunction with the Libyan Ministry of Education and local municipalities is still going, providing daily meal of date bars to 18,038 school age pupils in 58 schools in four municipalities in southern Libya.
- WFP completed the second round of its Food Assistance for Training activities in the Zwara region for 150 people. Through diverse trainings specific to the needs of local job markets, participants improved their skills in areas such as cooking, haircutting, car maintenance, and refrigerator/air conditioner maintenance. By the end of the trainings, 50 percent of participants had already started at least part-time work. An additional 20 people developed their skills through a similar WFP programme in Traghen, Murzuq.
- The Humanitarian Coordinator / Deputy Special Representative of the United Nations Secretary General, Mr Yacoub ElHillo, along with WFP representatives visited Misrata and Tawergha cities as the beginning of December. During his visit Mr ElHillo assured that the international humanitarian community remains committed and present in Libya and to be as close as possible to the people they serve.

Food insecurity remains a challenge due to protracted displacement, disruption to markets, and dwindling food production. Livelihoods and access to basic social services have been affected by the conflict, exposing the most vulnerable people to inadequate food consumption and forcing people into negative coping strategies, such as spending savings, cutting the number of daily meals, and reducing non-food related expenses, particularly in health and education.

### Core Common Services

- The Emergency Telecommunications Sector (ETS) is to re-launch the Common Feedback Mechanism (CFM) in early 2020, a common hotline and information package for conflict-affected populations.
- The UN Hub in Benghazi is fully operative. The Hub enables all UN agencies to operate in the East of the country.
- The Logistics Sector continues to provide sector-wide updates on relevant issues in Libya as they unfold.
- UNHAS is a critical service which continues to connect the country, ensuring safe, reliable air access for the humanitarian and development community in Libya.

### The Way Forward

- The operation is committed not just to the current emergency response but also to continuing the initiatives and commitments planned in its recently approved Interim Country Strategic Plan 2019-2020 (ICSP), which works across the humanitarian-development-peace nexus to support the review and rehabilitation of pre-crisis social protection systems. The ICSP helps WFP and its partners to work with the Libyan people to achieve zero hunger by 2030, in line with the Sustainable Development Goals (SDGs). Interventions include school feeding; cash-based transfers linked to social safety net programmes and government-led subsidy programmes, as well as food-for-training for resilience-building and the empowerment of youth and women.

### Monitoring

- WFP monitors its activities through a Libyan Third-party Monitor (TPM). In December, WFP and its TPM partner conducted 23 on-site monitoring visits to monitor food distributions across the western, southern and eastern regions of the country.

### Challenges

- Continuing clashes and a deeply unstable security and economic situation cause deep rifts in the country, making certain areas difficult to access for WFP and its partners and challenging the implementation of projects that require stability.
- Access has also been an issue for the safe implementation of flights, including the UN Humanitarian Air Service (UNHAS), which despite challenges continues to connect the country from East to West.

### Donors

- Canada, CERF, Germany, Italy, Japan, Luxembourg, Netherlands, Norway, United Nations Peacebuilding Fund (PBF).
