Operational Context
Situated between Central and South Asia, with a committed Government, rich natural resources, and a young and diverse population, Afghanistan has the potential to make significant progress towards the Sustainable Development Goals. However, a complex and protracted conflict combined with other challenges—including climate change and natural disasters, demographic shifts, limited job opportunities, pervasive gender inequalities, food insecurity and transparency concerns—has dramatically constrained the country's wider development efforts.

Food insecurity rose dramatically between 2014 and 2017 to a total of 13.2 million people in rural and urban areas according to the Afghanistan Living Conditions Survey 2016-2017 (ALCS). The 2019 IPC report shows that 10.2 million people are acutely food insecure. The report further projects that in the winter season, 11.3 million people (37% of the population) will be in IPC phase 3 or higher and hence in need of humanitarian assistance. The report further projects that in the winter season, 11.3 million people (37% of the population) will be in IPC phase 3 or higher and hence in need of humanitarian assistance.

In January, WFP assisted 560,036 people in need with 4,048 mt of food and cash. WFP disbursed US$233,184 in cash transfers to cover families' food needs. US$78.1 million is the net funding shortfall for the next six months (February – July 2020).

Operational Updates
- In January, WFP reached more than 560,000 food-insecure girls, boys, women and men across 28 of Afghanistan's 34 provinces.
- WFP's emergency response activities included food assistance and cash-based transfers to a total of 203,168 people. This included seasonal support for 164,542 highly vulnerable people in 12 provinces to get through winter and assistance to 24,605 conflict-affected people in 16 provinces.
- WFP provided 2,667 returnees from Iran and Pakistan with food assistance. In addition, WFP provided 2,401 people affected by flooding with in-kind food assistance and disbursed US$49,142 in cash transfers to 8,953 people in Kabul under its social safety nets initiative.
- WFP, in partnership with 997 health centres and partners, distributed 258 mt of specialized nutritious foods for 107,858 children under 5 and 32,180 pregnant and lactating women. WFP also provided 1,135 children and pregnant and lactating women (PLW) with 3 mt of specialized nutritious foods to prevent the deterioration of their nutritional status.
- Under the school feeding programme, WFP provided 80,823 primary school students with high energy biscuits each day at school. Further, 17,905 girls were also provided with fortified vegetable oil to take home, to encourage school attendance and reduce gender disparity.
- In Nangarhar, WFP started SCOPE registration for 2,178 secondary girl students. WFP will provide monthly cash assistance of AFN 1,200 (US$15) to each girl student, to reduce gender disparity and encourage school attendance.
- The United Nations Humanitarian Air Service (UNHAS) transported 1,065 passengers from 76 different agencies and organizations to 20 locations in Afghanistan.

* The UN estimates a higher number (14.28 million people) are likely to experience severe acute food insecurity in the winter season. This is due to the UN's population count for Afghanistan being higher than the official government statistics, on which the IPC report is based.

Operational Updates continued

- As part of its work on the humanitarian-development-peace nexus, WFP completed the rehabilitation of 15 irrigation canals of 173 km in length and 400 m protection wall in Zarang, Nimroz. This will protect 8,009 families and 1,200 ha of agricultural land at high risk of seasonal flooding. WFP supported 4,767 people with monthly food rations while they participated in the project.

- Across all resilient livelihoods activities, WFP assisted 81,158 food-insecure people with in-kind assistance in return for their participation in asset creation or vocational skills training, which included tailoring, embroidery, baking, food processing and beauty parlour.

- The Nimroz provincial committee of the Afghanistan Food Security and Nutrition Agenda was inaugurated with a one-day awareness workshop for local officials on 16 January. To date, WFP has supported the establishment of 28 provincial committees across the country with an aim to strengthen the Government’s capacity in ensuring that no Afghan suffers from hunger and malnutrition.

Access

- The temporary closure of 12 clinics in 7 districts of Nangarhar Province in mid-January by members of an armed group deprived communities of not only medical services but also treatment of malnutrition. Thanks to negotiations via community elders, WFP resumed services to two of the clinics on 22 January, which enabled WFP to deliver 13 mt of ready to use supplementary food for 2,100 children under 5 as planned on 26 January.

- To reach 3,550 highly vulnerable families in five districts of Badghis, Ghor and Kandahar, WFP is continuing to negotiate humanitarian access with the non-state armed group in control of the areas. Regular food supply to villages is disrupted due to roadside bombs and road blocks. As shops are empty, families are struggling to meet their basic food needs.

Funding

- Funding requirements for the coming six months (February – July 2020) are US$173 million, of which US$76 million remains to be resourced.

- It is urgent to replace and augment half of WFP’s fleet trucks after three decades of service. This will cost an estimated US$13.5 million for 100 trucks.

- The UN Humanitarian Air Service (UNHAS) annual budget requirement is US$17.5 million. Taking into account carryover funds available, cost reduction measures, received and anticipated contributions, and ongoing cost recovery, UNHAS will be able to operate at the current level until May 2020.
