Hunger Map 2020

If current trends continue, the number of hungry people will reach 840 million by 2030

Prevalence of undernourishment in the total population (percent) in 2017-19

- <2.5%
- <5%
- 5-14.9%
- 15-24.9%
- 25-34.9%
- >35%

DATA NOT AVAILABLE

Undernourishment is defined as the condition in which an individual's habitual food consumption is insufficient to provide the amount of dietary energy required to maintain a normal, active, healthy life. The indicator is reported as the prevalence of undernourishment (PoU) and is expressed as a percentage of the population that is undernourished.

The map shows the prevalence of undernourishment in the total population for the years 2017-2019 as a percentage. The data are based on a three-year moving average. Further information is available at https://www.wfp.org/publications/state-food-security-and-nutrition-world-sofi-report-2020
