Contributions to WFP have increased in recent years, and in 2020 we reached a record level of US$8.4bn – still more than 5 billion short of requirements. Rising needs aligned to the high cost of assisting people amidst drawn-out conflicts, climate-relate disasters and the coronavirus pandemic mean we need increased financial support more than ever.

WFP is the world’s largest humanitarian agency, assisting 115.5 million people in 84 countries in 2020.

Each day we have up to 5,600 trucks, 30 ships and 100 planes on the move, delivering food and other assistance in some of the most remote and challenging parts of the world.

Rising needs aligned to the high cost of assisting people amidst drawn-out conflicts, climate-relate disasters and the coronavirus pandemic mean we need increased financial support more than ever.

WFP is the frontline agency responding to emergencies caused by conflict, climate shocks, pandemics and other disasters. We are tackling ongoing emergencies in 17 countries or regions, the majority fuelled by conflict.

WFP connects smallholder farmers to markets in 35 countries. In 2020, we bought 110,486 metric tons of food from smallholders, who produce most of the world’s food.

More than three quarters of the food we buy comes from developing countries, saving time and money on transport costs and helping sustain and grow local economies.

More than 50% of the people WFP serves are women and girls.

WFP is helping 19 countries to forecast extreme climate events and trigger preventive action before vulnerable families are hit by disasters. Cash transfers ahead of floods, droughts and storms allow people in harm’s way to evacuate assets and livestock, reinforce homesteads and buy food, seeds and emergency items so they are better prepared to deal with a food crisis.

WFP delivered 4.2 million metric tons of food in 2020, the equivalent weight of 840,000 Asian elephants.

In 2020, 159,000 hectares of land was developed and 1,800 hectares of forest was planted under WFP’s Food Assistance for Assets initiative, which improves people’s long-term food security and resilience to climate change.

We provide school meals to 15 million children, improving both their nutrition and their access to a potentially life-changing education. Since 1990 we have built the capacity of national governments, with more than 40 taking over school meal programmes.
