Leveraging Good Practices to achieve Food Security and Nutrition in Africa
Who we are?
Who are we?

CERFAM: first CoE of its kind in Africa

Result of the strategic partnership between Côte d’Ivoire and WFP

Catalyst and hub of good practices and innovative solutions to hunger and malnutrition in Africa
Our Mission, Vision & Strategic objective

**MISSION**
Contribute to accelerating the progress towards the end of hunger and malnutrition in Africa

**VISION**
To be a catalyst and a hub of good practices and innovative solutions to hunger and malnutrition in Africa

**STRATEGIC OBJECTIVE**
Promote and facilitate the access to knowledge and knowledge exchange to transform good practices and lessons learned into opportunities for advancing the fight against hunger and malnutrition in Africa
Four pillars of CERFAM and its programmatic areas
CERFAM two-fold service offer

Promoting Good Practices
A platform for exchanges, that identifies, documents, and disseminates good practices, promising innovations, and lessons learnt. Thereby meeting our goal of Zero hunger.

Strengthening Country Capacities
A catalyst that facilitates dialogue, and technical assistance through the mobilization of expertise. These experts will then assist in the implementation of good practices against hunger and malnutrition, through promoting South-South cooperation.
Experience capitalisation and facilitation

Facilitation of a South-South learning exchange from a high-level Delegation from Burundi, led by the First Lady and three Ministers (Education, Health and Agriculture), to Benin.

Co-organization with High-level consultation on food fortification with the African Union, the Government of Côte d’Ivoire and the West African Health Organization.
Capacity strengthening by expert deployment and knowledge transfer

- Technical mission from Benin and Côte d’Ivoire to support cassava and banana value chain in the Republic of Congo

- Gap and need assessment in Guinea to improve rice value chain

- Rice pilot project in Côte d’Ivoire with Chinese technical support and technology in production and post-harvest management
Knowledge Management

- Knowledge Management stands at the core of CERFAM’s work.
- It produces the necessary documentation, and enables a rich knowledge sharing environment, focused on food security and nutrition.
- CERFAM knowledge sharing is organized into 2 main service areas: Good Practice Documentation and Experience Capitalization.
Operationalisation of Knowledge Management: CERFAM’s Knowledge Exchange Platform (KEPT)
CERFAM’s ambition: establishing strategic and operational partnership to foster synergies, bring complementarity and encourage solid cooperation

Collaboration with stakeholders to secure human, technical and financial resources and to forge partnership
Thank you
