COUNTRY STRATEGIC PLAN REVISION

REVISION

Philippines Country Strategic Plan, revision 7 Gender and age marker code: 3

	Current	Change	Revised
Duration	July 2018-June 2023	None	July 2018-June 2023
Beneficiaries	447,765	192,885	640,650
Total cost (USD)	48,555,771	12,060,337	60,616,108
Transfer	33,513,804	8,638,848	42,152,652
Implementation	6,166,567	1,832,153	7,998,720
Direct Support Costs	5,911,901	853,259	6,765,160
Sub-total	45,592,273	11,324,260	56,916,533
Indirect Support Costs	2,963,498	736,077	3,699,575

Philippines Country Strategic Plan, revision 7

1. RATIONALE

- 1. Through this revision, WFP will increase the crisis response budget under Strategic Outcome 1 for anticipatory action; allow for the distribution of fortified rice under the existing food assistance for assets interventions under Strategic Outcome 3; and, reflect the revised implementation plan and the conversion of some staff contracts.
- 2. The Government of the Philippines has a robust system to prepare for and respond to disasters, but those systems have been stressed in 2020 and 2021 by responses to disasters and the COVID-19 crisis. In response to these additional strains on the Government WFP will implement an anticipatory action pilot project, led by the United Nations Office for the Coordination of Humanitarian Affairs, under Activity 1 to support vulnerable populations prior to a disaster by providing them with cash assistance in case of an imminent extreme weather event.
- 3. Furthermore, WFP has increased support to the Government's effort under the convergence model to scale up livelihood interventions in the conflict affected areas by increasing Food Assistance for Assets (FFA) through cash-based transfers (CBT) under Strategic Outcome 3 and logistics, contingency planning and communications exercises under Strategic Outcome 5.
- 4. This revision adds the food modality to Activity 3 in order to distribute locally fortified rice as part of FFA interventions in the Bangsamoro Autonomous Region in Muslim Mindanao. This will accommodate an in-kind contribution of rice and build upon ongoing interventions implemented through cash transfers. Rice fortification will also support the implementation of the country's Food Fortification Law that aims to reduce the rates of micronutrient deficiency.
- 5. The GECS MOVE telecommunications project, in partnership with the Department of Information and Communications Technology, will provide a connectivity and communications solution to Government, humanitarian responders and affected populations after emergencies where regular infrastructure has been destroyed.
- 6. The revision will cover the period January 2021–June 2023.

2. CHANGES

Strategic orientation

- 6. This revision does not change the strategic orientation of the CSP.
- 7. There have been six revisions of this CSP:
 - a. Revision 1, approved by the Country Director (CD) in August 2018, increased the budget by USD 7,667,295 and allowed the CSP to absorb remaining resources from Protected Relief and Recovery Operation (PRRO) 200743.
 - b. Revision 2 was a technical revision.
 - c. Revision 3, approved by the CD in April 2019, increased the CSP budget by USD 1,754,109 for the emergency response in the Bangsamoro Autonomous Region of Muslim Mindanao.

- d. Revision 4, approved by the Executive Director in January 2020, increased the budget by USD 8,571,565 and was a comprehensive revision to increase Activities 1, 3 and 5.
- e. Revision 5, approved by the CD in September 2020, decreased the budget by USD 4,052,959 and reflected adjustments made for the shift from direct delivery to capacity strengthening.
- f. Revision 6, approved by the CD in December 2020, increased the budget by USD 1,966,038 for emergency response.

Strategic outcomes

- 8. Under Activity 1, WFP will support the implementation of an anticipatory action pilot in Region V (Bicol), targeting 25,000 households (125,000 individuals) who are socio-economically poor identified by local government units referring to the national and regional repository of data on poor households, reside in high-risk areas and therefore particularly vulnerable to strong typhoons. The project uses impact-based forecasts to activate the required readiness and anticipatory actions according to pre-defined thresholds and protocols. Targeted households will receive a one-off unconditional cash transfer of PHP 2,800 (USD 58) through a financial service provider such as Western Union and a cooperating partner for direct cash. The transfer value is the equivalent of 75% of the regional minimum daily wage for 10 days which follows the guidelines of the Department of Social Welfare and Development. The daily wage in the region is Php 310 per day or Php3100 for 10 days. The total cash amount includes a transportation allowance equivalent to Php 475 to assist the beneficiaries when they claim the cash assistance. WFP will also work with the United Nations Population Fund to provide topup cash transfers to 2,000 pregnant and lactating women identified among the targeted 25,000 households. This revision adds a contingency in 2022 for an additional response of comparable scope anywhere in the country.
- 9. Under Activity 3, WFP will provide 9,877 farming and fishing households (49,386 individuals) in the Bangsamoro Autonomous Region in Muslim Mindanao with 60 kg of rice per month for three months, conditional on their participation in community works asset creation activities identified in consultation with local communities and government authorities. The rice will be fortified locally with iron prior to distribution. WFP will also increase the CBT transfer for 18,500 beneficiaries expected to receive cash assistance. Further, 1,000 beneficiaries will receive direct capacity strengthening on vegetable production and nursery establishment. This intervention will build upon existing efforts implemented in the framework of the Food Security and Nutrition Roadmap of the Bangsamoro Autonomous Region in Muslim Mindanao under the inter-ministerial 'convergence' model, where WFP and the Government collaborate to achieve regional ecological integrity while welcoming former combatants back to society as productive contributors to the local economy. WFP will also explore the use of Digital Agriculture tools to enhance self-sufficiency of local farming communities. Such tools can provide greater access to farming information leading to improved yields, as well as greater access to buyers and markets. WFP will seek external partners in this effort.
- 10. Under Strategic Outcome 4, WFP will strengthen the capacity of government emergency response teams and the Department of Information and Communications Technology through the GECS MOVE COM project, focusing on disaster risk reduction management, preparedness, and emergency response management. WFP will pre-position equipment, support strengthening of the national Emergency Telecommunications Cluster and enhance the linkage between emergency telecommunications activities and the anticipatory action pilot.

- 11. <u>M&E</u>: WFP will conduct a baseline and a post-distribution monitoring assessment, as well as focus group discussions, to validate whether anticipatory action is more effective than post-crisis emergency response. WFP will continue to process and outcome monitoring for all interventions to verify and assess the quality of programme implementation in relation to beneficiary targeting, timeliness and utilization of cash and food transfer.
- 12. Accountability to affected populations, protection risks, restrictions of gender and disabilities: WFP will integrate gender, age, and disability considerations in all project phases to ensure that the new interventions consider and address the needs of women, men, girls and boys and mitigates any protection risks.
- 13. <u>Risk Management:</u> There is a risk of delays and targeting errors due to possible interference from local authorities in advance of upcoming elections. Clear targeting criteria, awareness-raising on the details of the programme as well as the participation of women, men, on the locally organized management committee as well as a strong complaints and feedback mechanism, will mitigate these risks.

3. COST BREAKDOWN

14. In addition to the new and expanded interventions described above, changes to the budget reflect the re-alignment of annual costs under Strategic Outcome 4, an increase in the CBT value of Strategic Outcome 3 to align with the revised implementation plan as well as increased staff costs across the portfolio as a result of conversions from short-term to fixed-term contracts.
