POLICY EVALUATIONS
Guidance for Process and Content

Centralized Evaluation Quality Assurance System

November 2021
Foreword

The Centralized Evaluation Quality Assurance System (CEQAS) is one of the building blocks for the implementation of the World Food Programme (WFP) Evaluation Policy (2016-2021). As such, it is the WFP Office of Evaluation's primary means of safeguarding the international evaluation principles of:

- **Independence**: by setting standards that increase impartiality of the evaluation process and reporting on findings
- **Credibility**: by setting standards that ensure evaluations are evidence-based and follow transparent and systematic processes
- **Utility**: by building milestones into evaluation processes for timeliness and reporting standards to ensure accessibility.

The CEQAS guides all evaluations undertaken by the WFP Office of Evaluation and its consultants.

The CEQAS is a comprehensive system covering all types of evaluations: strategic, policy, country strategic plan, corporate emergency, and synthesis.

The CEQAS is a working tool for WFP evaluation cadre and evaluation teams covering all stages of the evaluation cycle. It is not a comprehensive handbook on evaluation and does not replace the rich range of evaluation literature.

The CEQAS pack for each evaluation type consists of:

I. Guidance for process and content
II. Templates
III. Quality checklists
IV. Technical notes and other reference material

Initiated in 2007, the Evaluation Quality Assurance System (EQAS) is subject to periodic and systematic updates in line with the Office of Evaluation's evolving needs and international best practice. CEQAS was comprehensively reviewed and updated in 2013. In 2017, the guidance was further updated to strengthen the integration of gender equality and women's empowerment (GEWE) and to account for starting to implement the “Integrated Road Map”.

In 2019, further revision was made to CEQAS for country portfolio evaluations in order to transform them into country strategic plan evaluations. In 2020, the Office of Evaluation reviewed its EQAS across all types of evaluations to ensure closer alignment where required and reflect recent UNEG guidance, such as the 2020 Ethical Guidelines for Evaluation. Further updates and new materials will continue to be added as needed to ensure the EQAS continues to reflect emergent best practice and management requirements.

Andrea Cook, Director of Evaluation, November 2021

Introduction

1. **Policy evaluations (PEs)** are part of the policy development process at WFP. The Policy Formulation Document approved in 2011 indicates that “within four to six years of implementation, a policy is evaluated to assess its effectiveness.” This instruction was then included as a coverage norm in the Evaluation Policy (2016-2021) indicating that all policies will be evaluated four to six years after implementation starts.

2. **Overview of the guidance.** These guidance materials apply to the management and conduct of PEs. They are structured following the five phases of an evaluation, focusing on processes, outputs and quality standards that will be used for each of them. The five phases are:
   1. Preparation
   2. Inception
   3. Data collection
   4. Reporting
   5. Follow-up and dissemination

3. **The process guidance** shows the roles and responsibilities of each stakeholder: evaluation managers; research analysts; evaluation team leaders and team members; WFP stakeholders, including headquarters policy owners and other relevant divisions (headquarters), regional bureaux, regional evaluation units and country offices; other stakeholders; the Director of Evaluation (DoE) or the Deputy Director of Evaluation (DDoE) whenever responsible for clearance of the PE.

4. **The content guides and quality standards** are provided for the outputs produced during each of the evaluation phases. This guidance provides a brief introduction of general principles. Templates and a quality checklist for each product are used by the evaluation manager, the second level quality assurer, the research analyst, evaluation team leaders and evaluation teams.

5. Links are provided to other Office of Evaluation guidance, such as cross-cutting technical notes.

6. Key UNEG guidance such as UNEG norms and standards, 2020 UNEG Ethical Guidelines for Evaluation, UNEG guidance for Integrating Human Rights and Gender Equality in Evaluation, and the UNEG United Nations Disability Inclusion Strategy are also referenced where relevant.

7. **Overview of time taken to conduct a PE.** The time for conducting a PE is approximately 15 months from the initial preparation to the follow-up and dissemination phase, when the reports are presented to the Executive Board. However, the core of the process, which includes inception, evaluation and reporting, would normally last up to nine months. The table 1 below illustrates the duration of each phase. The Global and Synthesis Unit is responsible for updating this Process Guide and coordinating policy evaluation planning and conduct.

   **Table 1: Average time to complete a policy evaluation**

8. The timeframe aims to balance the necessary requirements for quality and feedback while also ensuring timeliness and utility with regard to the policy-making process. The preparation phase, including the preparation of the Terms of Reference (ToR) and selection of an evaluation team from among the list of stakeholders.
companies with the long-term agreement (LTA) with the Office of Evaluation\(^3\) may be completed well in advance of the start of the inception phase. The follow-up and dissemination phases are related to the timing of Executive Board sessions in terms of completion.

9. **Quality assurance (QA):** The WFP EQAS sets out processes with steps for QA and templates for evaluation products based on standardized checklists. The QA will be systematically applied during the evaluation and relevant documents will be provided to the evaluation team. This QA process does not interfere with the views or independence of the evaluation team but ensures that the report provides credible evidence and analysis in a clear and convincing way and draws its conclusions on that basis. The evaluation team will be required to ensure the quality of data (reliability, consistency and accuracy) throughout the data collection, synthesis, analysis and reporting phases. The Office of Evaluation expects that all deliverables from the evaluation team are subject to a thorough QA review by the evaluation company in line with the WFP EQAS prior to submission of the deliverables to the Office of Evaluation. All final evaluation reports will be subjected to a post hoc quality assessment (PHQA) by an independent entity through a process that is managed by the Office of Evaluation. The overall rating category of the reports will be made public alongside the evaluation reports.

10. For the **preparation phase**, the evaluation manager has primary responsibility for developing the ToR in line with CEQAS standards. The evaluation manager is also responsible for drafting the summary evaluation report in the reporting phase in consultation with the evaluation team leader. These deliverables will each be quality assured either by the Head of the Global and Synthesis Unit or by the Deputy Director of Evaluation. The second-level quality assurance (QA2) will complete the quality checklist for ToR and SER, respectively, and share it with the approver if it is different than the QA2.

11. For the **inception and reporting phases**, the evaluation team leader and, when relevant, the consultancy company that hired her or him, have primary responsibility for the timely delivery of evaluation products that meet the centralized evaluation quality standards. In addition, there are two levels of QA within the Office of Evaluation for products developed by evaluation teams:

   a. **First-level quality assurance (QA1)** is undertaken by the evaluation manager with support of the research analyst, as relevant, for the outputs to be produced by the evaluation team at each stage of the process: each draft of inception and evaluation reports.

   b. **Second-level quality assurance (QA2)** is undertaken by the Head of the Global and Synthesis Unit, Deputy Director/Director of Evaluation on all agreed evaluation deliverables produced by the evaluation team. The QA2 should receive completed QA checklists for each product submitted by the evaluation team and assured by the QA1. When satisfied with the quality, the QA2 may directly provide a recommendation for clearance to the Director of Evaluation or the Deputy Director if designated as responsible for clearance of an evaluation deliverable by the Director of Evaluation.

12. **Final approval of documents.** All documents are to be approved by the Deputy Director/Director of Evaluation, as appropriate. Submission of documents for approval should be done through the electronic approval system after anticipating the date of submission in the calendar of deliverables.

13. An overview of the evaluation phases, quality standards and references material is provided in Figure 1.

---

\(^3\) Should no evaluation firms present viable proposals, individual evaluators can be hired by the Office of Evaluation to make up an evaluation team.

**PHASES**

1. PREPARE
2. INCEPTION
3. DATA COLLECTION
4. REPORTING
5. FOLLOW-UP AND DISSEMINATION
Phase 1: Preparation

The principles of independence, impartiality, credibility and utility, as well as ethics, have a number of specific implications at the preparation phase, as follows:

**Independence:** The evaluation manager ensures that the selected independent evaluators have not had prior involvement with the subject to be evaluated and have no vested interest.

**Impartiality:** The evaluation manager prepares the ToR following this process guide to ensure an absence of bias in terms of scope and design. A reference group, which includes key stakeholders, is formed to help steer the evaluation and reduce risk of bias. Impartiality is critical to the usefulness and credibility of the evaluation.

The **credibility** of an evaluation is determined by its independence, impartiality, transparency and methodological appropriateness and rigour. The selected evaluation team should have a track record of producing high quality evaluations.

**Utility:** An explicit discussion on the intended use of the evaluation takes place with internal and external stakeholders. The evaluation questions should be focused, appropriate and relevant to the users' needs and linked to the evaluation’s objective(s) (accountability and/or learning). The evaluation ToR clearly set out the evaluation's purpose, scope, and intended use(s) by various stakeholders. The evaluation manager effectively steers the evaluation process to ensure adherence to the planned timeline and timely completion of the evaluation.

**Ethics:** The UNEG ethical guidelines include a pledge of ethical conduct in the evaluation that has to be followed by all evaluation commissioners and evaluators contracted by WFP, as well as a checklist of ethical issues that the evaluation manager and evaluation teams should consider at each phase of the process.

14. A policy evaluation begins with an email from the Director of Evaluation to **launch the evaluation** and request meetings to define the scope. The evaluation manager reached out to key stakeholders for initial consultations and to gather documentation to inform the development of the ToR for the evaluation.

15. **The ToR** are the major output of the preparation phase and they provide the first substantive overview of the evaluation. They constitute the evaluation manager’s main instrument to inform key stakeholders of the evaluation approach, and to instruct potential evaluators on the assignment as the basis of their proposals. The ToR are annexed to the contract of the selected consultancy firm or to the contract of individual members of the evaluation team when hired as individual consultants. A description of the ToR preparation process is available in Section 1.2.

16. A country selection matrix including information on all countries where WFP has activities is maintained by the Global and Synthesis Unit. Data on population, income classification, CSP timeframe, needs-based plan and recently completed, on-going or planned evaluations and audits by country is some of the data captured for the benefit of global evaluations. Country selection for missions or desk reviews is a fundamental part of all global evaluations and data from country studies is expected to inform global analysis. The final approval of country selection rests with the DoE/DDoE. The EM should consult the most recent version of the country selection matrix and adapt it to include data specific to the subject of the evaluation. This will enable an examination of data across countries and regions and will facilitate the identification of a long list of countries included in the TOR.

17. Once the ToR are cleared, a two-page **summary ToR** is prepared as a communication tool to be used throughout the evaluation.

18. In addition to developing the ToR, there are other steps in the preparation phase:

19. **Internal Reference Group (IRG).** During the preparation phase, the evaluation manager is responsible for identifying key units/Divisions/Departments and drafting the request for nominations for IRG membership, which is issued by the DoE/DDoE, informing potential members of their roles in the evaluation.
process and formalising the IRG. The overall purpose of the IRG is to contribute to the credibility, utility and impartiality of the evaluation by providing feedback on key deliverables. For this purpose, its composition and role are guided by the following principles:

- **Accuracy**: Feedback from stakeholders at key steps of the preparatory, data collection and reporting phases contributes to accuracy of the facts and figures reported in the evaluation and of its analysis.
- **Transparency**: Keeping relevant stakeholders engaged and informed during key steps ensures transparency throughout the evaluation process.
- **Ownership and use**: Stakeholders' participation enhance ownership of the evaluation process and products, which in turn may positively impact its use.

20. The IRG should be composed of representatives of the policy owning unit/division and other headquarter-based divisions and regional bureaux focal points whose role relates to the evaluand.

21. **External Advisory Group (EAG)**. In many cases, it is beneficial to identify external experts who can provide advice to the evaluation manager on the subject or the conduct of the evaluation. Whereas it is not mandatory for PEs, if deemed appropriate and useful, the evaluation manager should identify between three and five experts in consultation with the QA2 and DDoE/DDoE (depending on who is clearing the evaluation deliverables). This should be done during the TOR preparation phase and should include relevant subject-matter experts. Advice is sought on draft inception and evaluation reports, at a minimum.

22. The EM should ask for suggestions from key IRG members and also identify names drawing from the research carried out to develop the evaluation TORs. Once a list of potential EAG members has been compiled, the EM will discuss it with the QA2 and DoE/DDoE. Following that discussion, the EM will draft an email to be sent from the DoE account to reach out to the individuals identified to request their engagement.

23. As no honorarium is typically offered, emphasis should be placed on the value to be gained by the EAG member through their association with an evaluation of a WFP thematic area. An acknowledgement can be added to the ER as follows: *The contribution of EAG members will be acknowledged including their name and affiliation in the inside cover page of the final evaluation report that will be uploaded on the WFP evaluation portal page and disseminated widely internally and externally to WFP.*

24. **Communication and knowledge management plan**. In the early stages of the evaluation, the evaluation manager is responsible for preparing a communication and knowledge management plan defining the ways in which the various stakeholders will be involved throughout the evaluation process and how the findings of the evaluation will be communicated and disseminated in order to stimulate learning in WFP and beyond. The plan should be further developed during the inception phase, in consultation with the policy owner and the Office of Evaluation’s communications officer. For more details, please refer to the communication and knowledge management plan.

25. **Identification and contracting of an evaluation team**. Finally, the preparation phase also includes the identification and contracting of an evaluation team to undertake the evaluation. The evaluation manager should check the LTA tracking sheet to identify the firms that expressed an interest in conducting the evaluation. Assuming that there were a sufficient number of firms that responded positively, information on the timeline of the evaluation, the scope and team requirements can be shared with the firms that expressed interest. Once the ToR have been finalized, these are shared with the shortlisted companies with a clear deadline for submission of a technical and financial proposal according to the relevant template. The link to the scoring table to be used for the assessment of the proposals is listed as key reference material under Section 1.3. Once the appropriate team has been selected, the evaluation manager will draft a decision memo to be submitted electronically to the QA2 and then the Deputy Director/Director of Evaluation for approval. The decision memo should include a recommendation to justify the selected company and evaluation team, the budget for the whole evaluation, including the cost for the evaluation conduct and any costs to be incurred by the evaluation manager, the ToR, scoring grid with the results of the assessment, and list of all team members with the roles and daily rates.

26. **GEWE**, as well as equity and inclusion approaches should inform evaluation thinking from the start of the preparation phase throughout the evaluation. The templates and quality checklists signal clearly when this should be done, starting with the ToR template, Technical Note on Integrating Gender in WFP Evaluations, and quality checklists.
1.1 PREPARATION PHASE PROCESS GUIDE

27. The purpose of the process guide is to provide a step-by-step description of the process leading to the finalization of the ToR and the summary ToR, the selection of the evaluation team, and the communication and learning plan, highlighting the roles and responsibilities of each stakeholder.

28. The steps, including the roles, responsibilities and actions are provided in Figure 2.
Figure 2: Process map for preparation and finalization of the Terms of Reference

- Collects and reviews key documents
- Identifies key stakeholders: internal (WFP) and external (governments, institutions, partners), and establishes an IRG. Consideration is given to the value in establishing an EAG.
- Undertakes preliminary consultations with key stakeholders to get an overview of: priorities and concerns; the dimensions of the evaluand; data availability and quality; political dimensions.
- Under supervision of the evaluation manager:
  - Builds an E-library
  - Collects relevant documents (corporate, global)
  - Liaises with evaluand focal point for additional documentation
  - Drafts text on data quality and availability
  - Oversees the development of a list of stakeholders, including for the IRG
  - Inputs basic information on the evaluation into the MIS.
- Prepares draft ToR (including communication & knowledge management plan and IRG composition)
- Submits draft ToR to the QA2
- Review draft ToR. Gives feedback to evaluation manager, either:
  - approval (assuming DDoE/DoE is the QA2) or clearance to submit to the DDoE/DoE.
  - request for revision
- If cleared, prepares draft email and draft ToR and comments matrix to be issued to Director-level policy owner and other relevant Directors/Chiefs from the DoE account and signed off by either the DoE or DDoE; or,
- Revises draft ToR, if necessary; repeat previous step
- Sends out renewed call for an expression of interest or shares draft TORs with LTAs that have expressed interest requesting them to prepare a proposal.
- The IRG will have a minimum of two weeks to comment on the ToR.
- Reviews the comments and revises the ToR accordingly
- Adds replies to the comments’ matrix to explain action taken
- Reviews proposals from evaluation firms, assess them using the standard template and prepares an online decision memo to be submitted to the DDoE/DoE for approval. Refer to Annex 1 for LTA scoring table.
- Approves the final ToR
- Approves the budget and selection of the LTA by signing off on the Decision Memo (add link to template)
- Shares final TORs with OPC
- Sends out email to potential EAG members requesting participation.
1.2 PREPARATION PHASE CONTENT GUIDE AND QUALITY STANDARDS

29. The purpose of this section of the guidance is to assist evaluation managers in drafting the ToR for PEs. The ToR should follow the structure and standard content described in the template for the ToR. The content will be adapted to the specific subject under evaluation and should cover the minimum requirements as per the quality checklist. The ToR should not be longer than 11,000 words, excluding annexes.

30. QA aims to ensure that enough background research has been undertaken to set out ToR that will adequately guide the conduct of the evaluation. The quality checklist will be used by the Head of the Global and Synthesis Unit to assure quality, providing systematic and constructive feedback as needed. The quality checklist includes:

   a. Criteria concerning the content (accuracy, adequate level of detail to understand the issues without being too detailed, well substantiated choices, for instance, when narrowing down the scope, etc.)

   b. Checking whether the required content has been included in the ToR

   c. Process (for instance, timeline).

Figure 2: Process map for preparation and finalization of the Terms of Reference

- Sends the final ToR to members of the IRG along with the full comments matrix, including feedback on the points raised.
- Sends the ToR to Communications Unit for posting on the WFP websites (internal and external)
- Follows up with the Admin team to ensure the creation of the PO
- Collects ethical and confidentiality pledges from all evaluation team members
- Follows up with potential EAG members once the email from the DDoE/DoE has been sent out.
Phase 2: Inception

The principles of independence, credibility and utility, as well as ethics, have a number of specific implications at the inception phase, as follows:

**Independence:** To ensure the adequate implementation of evaluation standards and principles, the evaluation manager and stakeholders should provide the evaluation team access to key informants and all available data at the start of the inception phase.

**Credibility:** The evaluation approach and methodology should be appropriate to respond to the evaluation questions and the methods for data collection, analysis and interpretation should be transparently documented in the inception report. The sites and stakeholders should be selected according to explicit criteria. The inception report should benefit from inputs from key stakeholders and a rigorous QA process.

**Utility:** The evaluation team, with the support of the evaluation manager, should ensure an efficient evaluation process as per the timeline in order to avoid a late completion of the evaluation.

**Ethics:** Evaluators should behave ethically in all interactions with stakeholders. Adequate ethical safeguards and data collection methods should be clearly indicated in the inception report.

31. The inception phase serves to ensure that the evaluation team (leader and members) develop an in-depth understanding of the subject of the evaluation and other requirements indicated in the ToR and can translate them into a work plan according to which the evaluation will be carried out. The work plan includes the process of conducting the evaluation as well as the data collection and analysis methods selected to answer the evaluation questions.

32. The inception phase involves an initial analysis of background materials and discussions with key stakeholders that will give the evaluation team a greater understanding of issues and concerns related to the policy being evaluated and its implementation. The evaluation team is also expected to further expand some elements of the ToR, notably ensuring that the evaluation subject, context and scope are correct, relevant, up-to-date, appropriately nuanced and politically sensitive. The inception report (IR) is meant to clearly confirm the evaluation approach, scope and methodology, including how the work is to be performed, who is to do what, what is to be produced and when deliverables are expected.

33. Within this framework, the main objectives of the inception phase are to:

- Analyse the theory of change related to the policy and/or related documents; (re)construct a theory of change related to the policy should it not include one
- Finalize the evaluability assessment
- Fine-tune the evaluation scope and sub-questions as relevant and appropriate, also in view of the evaluability assessment
- Agree upon the evaluation methodology giving due consideration to ethical issues, risks and mitigation strategies
- Consider the modality to be applied in the data collection phase – virtual, in-person or a combination of the two
- Finalize the selection of countries to be included in the evaluation as either desk reviews (document review only), desk review ‘plus’ (document review with a select number of remote interviews – maximum ten) or full missions (document review + one week in-country to conduct a full set of interviews/FGDs with stakeholders, site visits; longer if carried out using a remote modality)
- Develop a detailed evaluation matrix
- Develop data collection tools and test them as appropriate and feasible
- Interview key informants and confirm criteria for field missions, including inception mission(s)
- Deepen and finalize the stakeholder mapping and analysis
- Finalize the communication and knowledge management plan
• Develop a detailed workplan with roles and responsibilities for the team and deadlines for each deliverable
• Elaborate a field visit schedule (virtual or in-person).

34. Section 2.1 explains the activities that should be conducted during the inception phase; Section 2.2 provides guidance on the expected content and quality standards of the inception report; and Section 2.3 includes links to all relevant reference documents for this phase.

2.1 INCEPTION PHASE PROCESS GUIDE

35. The inception phase requires that the ToR are final. The evaluation team should have been identified and hired as well. The following will have been completed and provided to the evaluation team:

- ToR
- Library of relevant documents on a file sharing platform
- Preliminary stakeholder analysis and list of stakeholders.

36. The process guide clarifies roles, responsibilities and participation during the inception phase and provides a step-by-step description of tasks, particularly those leading to the finalization of the inception report for the evaluation.

37. A headquarters briefing should be held early in the inception phase to ensure the team is fully appraised of the Office of Evaluation’s requirements for PEs and that it has the opportunity to interact with WFP headquarters stakeholders. This will be virtual or in-person depending on the circumstances, but the physical presence of the team leader and selected team members in Rome for the briefing will add value in terms of team-building with the evaluation manager and preparation of the inception mission. The briefing is not generic but requires the evaluation team to have conducted an initial literature review and begun preparations so that the briefing is also structured around their specific questions. See Figure 3 for an overview of the roles and responsibilities of the headquarters briefing.

**Figure 3: Overview of roles and responsibilities for the headquarters briefing**

38. Inception missions are instrumental to the objectives of the inception phase. They provide the evaluation team with an ability to test data collection tools and explore the subject of the evaluation from a different vantage point. The consideration of criteria to choose inception missions and future data collection missions is a critical aspect of the inception phase. Evaluation teams are to be provided with a set of data across a range of standard indicators in the form of a country selection matrix. Data that is specific to the evaluation subject is also to be shared with the team so that decisions about where to conduct inception and data collection missions can be taken jointly.
39. The objectives of the inception mission are to:

- Meet stakeholders to understand their perspectives and concerns related to the subject under evaluation and its implementation
- Finalize the evaluability assessment, including data availability/quality and utility
- Test data collection tools and sampling approaches
- Engage with a range of stakeholders in an effort to refine the evaluation sub-questions and methodology.

40. For PEs, the inception mission(s) is conducted by the evaluation team leader, together with the evaluation manager. The research analyst may also attend the inception mission(s), subject to approval by the Head of the Global and Synthesis Unit, Deputy Director/Director of Evaluation and the Head of Analytics and Research Unit. The decision will be made taking account of (a) data needs (where the research analyst can add most value); and (b) logistics and budget availability.

41. In-person inception missions usually last five working days. Regional bureaux stakeholders may be contacted ahead of a country mission. Inception missions may include a one to two day visit to an associated regional bureau.

42. **Preparation of the inception report.** The inception report is the operational plan for the evaluation and provides transparency to key stakeholders on what the evaluation will cover and how it will be carried out. Therefore, the draft inception report should focus on issues that affect the evaluation scope, validation of the theory of change, methodology and fieldwork. Approaches to data protection, storage and treatment should be clearly identified. All issues should be resolved before the inception report is considered final. The data collection phase cannot start until the inception report has been approved.

43. An overview of the roles and responsibilities for different aspects of the inception phase are described in Figure 4.
**Figure 4: Overview of roles and responsibilities for the inception phase**

- Provides the team with relevant documents (background materials on the subject of the evaluation and EQAS documents) for preparation prior to the inception phase
- Organizes and participates in the headquarters briefing interviews and inception mission(s)
- Shares data for the purposes of country mission selection
- Discusses possible methodological approaches to enhance utility
- Discusses the role of the evaluation manager in the analysis of the data prior to report writing
- Prepares emails to send to Country Directors request participation in data collection missions.

- Provides the evaluation team with access to the E-library. Supports the evaluation manager in identifying and highlighting key reading material
- Supports the preparation of (a) the headquarters briefing; and (b) the inception mission (s)
- Prepares PowerPoint presentation on datasets and delivers presentation to the evaluation team
- Follows up with stakeholders on documents mentioned during the briefings
- Participates in the inception mission (if approved) to support data collection and analysis
- Updates MIS once the IR has been approved by the DDoE/DoE
- Analyses data for the data collection missions.

- Reviews ToR and other relevant documentation in preparation for the inception briefings
- Coordinates the evaluation team engagement in the headquarters briefing, leads the inception mission and the development of the inception report in line with the process guide
- Shares ideas on approaches to data collection and sampling.
Figure 5: Process map for inception report preparation

- Drafts the inception report according to the template and ensures internal QA is carried out
- Submits the quality assured draft to the evaluation manager by the agreed deadline.

- Reviews and comments on the draft inception report, with support of the research analyst
- Consults with the QA2 on major issues that need his/her input, views or agreement
- Provides feedback to the evaluation team using the quality checklist.

- Reviews and provides comments on the draft inception report, specifically on data accuracy and consistency, and on other topics as requested by the evaluation manager and as relevant to the research analyst role.

- Reviews the draft inception report and completes the quality checklist
- Shares comments with the evaluation manager for communication to the team leader.

- If required, revises the draft inception report based on comments received and submits it to the evaluation manager.

- Reviews revised report re-submitted by the evaluation manager prior to submission for clearance by the Director or Deputy.

- Reviews the revised draft inception report and submits it to the QA2 for approval to be shared for comment
- Prepares email to issue the draft inception report and comments matrix to the IRG and relevant CDs for comment within a 2-week time frame.

- Once cleared, issues draft inception report to the IRG and CDs of countries where inception mission(s) took place for comments based on a draft email prepared by the EM

- Reviews consolidated comments received and provides written guidance to the evaluation team, as relevant
- Shares the consolidated comments with the team leader with a request that they be addressed in the matrix and by revising the inception report
- Once this is done, submits the final inception report and the completed comments matrix to DoE/DDoE through the approval system, routed via the QA2.

- Reviews all comments received, provides responses to each of them and revises the IR accordingly
- Submits revised and final draft IR to the evaluation manager.
2.2 INCEPTION PHASE CONTENT GUIDE AND QUALITY STANDARDS

44. The purpose of this guidance material is to assist the evaluation team and the evaluation team leader in drafting the inception report. The inception report should follow the structure described in the Office of Evaluation template. The content should cover the minimum requirements as per the quality checklist and be adapted to the specific policy under evaluation. It should not exceed 15,000 words, excluding annexes.

45. QA aims to ensure that sufficient research, stakeholder consultation and analysis have been undertaken to inform the methodology of the evaluation and to guide its conduct. The PE inception report quality checklist includes:

- Expected content and assessment criteria for each section of the IR, including evaluation features, context, description of the subject of the evaluation, including Theory of Change, scope, stakeholder analysis, evaluation approach, methodology and ethical considerations, evaluation matrix, data collection methods and sampling criteria
- Criteria concerning the workplan, its feasibility and likelihood of generating a credible evaluation
- A content outline
- Process steps and minimum standards.

46. The evaluation manager, with the support of the research analyst, carries out QA1 of the inception report, using the quality checklist to provide systematic and constructive feedback. The evaluation manager then submits the draft inception report to the Head of the Global and Synthesis Unit or to the Deputy Director/Director of Evaluation as QA2 and approver.

Phase 3: Data collection

The principles of independence, credibility and utility, as well as ethics, have a number of specific implications at the data collection phase, as follows:

**Independence:** Ensuring independence and impartiality mean the non-participation by WFP or partner organization staff in the team's data collection activities with external stakeholders. The evaluation team leader has the final authority on who should attend data collection meetings. The evaluation manager and the team leader are responsible for anticipating different interests and counteracting attempts to avoid focus on particular issues or with particular subgroups, or to influence the evaluation in any way. The evaluation manager ensures that evaluators have full access to available information and data as per the WFP Directive on information disclosure. Evaluators have full freedom to conduct their evaluative work without interference or fear for their career. Any challenges should be reported to the DoE/DDoE in a timely manner to facilitate resolution.

**Credibility:** The evaluation manager ensures that the evaluation is implemented as per design. If challenges arise during the field mission, adjustments are made ensuring that those do not undermine impartiality.

**Utility:** The evaluation team organizes a debrief at the end of the evaluation mission with the support of the evaluation manager and the participation of country offices/regional bureaux/headquarters as appropriate.

**Ethics:** The evaluators behave ethically in all interactions with stakeholders and beneficiaries. They ensure informed consent, protecting privacy, confidentiality and anonymity of participants and cultural sensitivity. They respect the autonomy of participants. They ensure the participants’ fair recruitment and that evaluation results do not harm them or their communities. They have an obligation to report any noted incidents of fraud, corruption, PSEA or other wrongdoing.4

47. The data collection phase is the phase when the evaluation team collects, synthesizes and starts analysing information and data from primary and secondary sources as indicated in the inception report. It is the time when the evaluation team pulls together the evidence on which it will report.

48. The details of the data collection phase are determined by the methodology chosen for a given evaluation. Therefore, it may differ for each evaluation. The principles provided here apply to all PEs.

3.1 DATA COLLECTION PHASE PROCESS GUIDE

49. The data collection phase requires that the inception report is approved. In this phase the operational plan found in the inception report is implemented.

50. The data collection phase is conducted by the evaluation team and consists, in general, of the following steps: team briefing, desk review and in-country activities.

51. **Team briefing(s).** The team leader will brief all team members to ensure they have understood the requirements of the evaluation and the operational plan in the inception report. The team briefing(s) should also serve to come to clear agreements on the data collection, analysis and reporting requirements by each team member.

52. **Desk review.** A thorough review of existing data and documentation concerning the policy area and associated relevant literature should start at the inception phase. During the data collection phase this will be expanded as needed and each evaluation team member should have a complete understanding of the documented evidence/information relevant to his/her part in the PE. This level of preparation is essential to ensure best use of the time in the field when additional information and data should be collected.

---

4 See guidance here: [Where to seek support and report wrongdoing in WFP | WFPgo](https://www.wfp.org/wfhub/standard-operations)
53. **Interviews.** The evaluation team should conduct interviews with all relevant internal and external stakeholders/key informants, including WFP employees at headquarters, regional bureaux, country offices and WFP offices, as relevant. External stakeholders may include partner agencies, representatives of comparator organizations, technical experts, academics or others.

54. **Regional/country missions.** Data collection in regional bureaux or country offices may by virtual or in-person and may take the form of desk reviews, desk review ‘plus’ and/or country missions. The former will not involve interviews with colleagues based in-country but will focus solely on a review of existing documentation. Desk review ‘plus’ focuses primarily on the review of documentation with a few select interviews (maximum ten). The latter will involve document review and (in-country or virtual) interviews and site visits. Country missions will include:

- Security briefing (in-country missions only)
- Briefing with senior management to introduce the evaluation team and present the goals of the mission. Any concerns or issues of relevance are to be raised by senior management.
- Briefing with focal point for the evaluation, during which:
  - The evaluation team explains to stakeholders the purpose and conduct of the evaluation and why the country has been selected for the particular evaluation.
  - The country office should present the agenda for the mission and clarify any final points necessary to ensure the smooth conduct of the mission.
- Interaction with WFP and other stakeholders through interviews, focus group discussions, and participatory evaluation methods, and collection of additional documentation and data, depending on the evaluation design.
- Exit debrief with senior management and all relevant staff (together or separately). See details in paragraph 55.

55. In-country meetings with government counterparts will be facilitated by country office colleagues, including attending the meeting to introduce the team leader and team members. Once the introductions have been done, the country office colleagues should leave the evaluation team to carry out the interview independently.

56. **Other data collection methods** may be used as relevant to ensure the successful conduct of the evaluation as agreed in the inception report.

57. **Data protection and confidentiality.** The evaluation team must ensure confidentiality, and the protection of data when, processing, storing and/or transferring personal data throughout data collection activities and seek the consent of respondents. More specifically, when seeking personal data through surveys, focus group discussions and interviews, the evaluators should disclose the purpose of the evaluation and with whom the data may be shared. They should also provide contact details of the person/entity to refer to for any concern on the use of his/her personal data. In the course of the evaluation, personal data on beneficiaries should be encrypted and stored to restrict their accessibility. The evaluation team should establish in advance the data retention plan, that is, how long the personal data collected should be available for the use of the evaluation. Should evaluators uncover allegations of wrongdoing or misconduct in the implementation of a programme either by a WFP staff member or a partner, the evaluation team leader should report those allegations to WFP Office of the Inspection and Investigation through the WFP hotline.⁵

58. **Analytical workshop.** The evaluation team should then organize an internal meeting/workshop where all data is gathered and analysed. In some cases, it may be beneficial for the evaluation manager and research analyst to participate in such a meeting. This should have been discussed and agreed to during the inception phase.

---

⁵ [http://www.wfphotline.ethicspoint.com](http://www.wfphotline.ethicspoint.com)
3.2 DATA COLLECTION PHASE CONTENT GUIDE AND QUALITY STANDARDS

59. **Exit debrief.** At the end of each country mission, the evaluation team should organize an exit debrief (usually delivering a PowerPoint presentation) to report back on the process, share early impressions, clarify any information gaps and highlight next steps. In order to provide more considered feedback from the country mission, the debrief should be virtual and held in the week following the mission. This will allow the team to complete all aspects of the mission and have some time to reflect on it before reporting back to stakeholders in-country. Whereas the PowerPoint presentation is not a formal evaluation deliverable, debriefing to the country office is mandatory as set out in the communication and knowledge management plan for the evaluation.

60. The exit debrief presentation is the evaluation team’s document and will not be commented on or revised. It will serve as a reference document to stakeholders, including the evaluation manager, once they receive the evaluation report.

61. The exit debrief will be made available to the evaluation manager and the country office management. It should include as relevant:

- Purpose (evaluation objectives and uses)
- Context and reason for country selection
- Overview of methodology
- Preliminary findings of relevance to the country context and to the evaluand
- The remaining gaps in data collection needs and where help is required
- Next steps, including feedback loops and opportunities for engagement.

62. **Data collection debrief:** Policy evaluations employ myriad data collection methods. The evaluation team leader is required to make a debrief presentation to key stakeholders at the end of the data collection phase and prior to report writing. This is usually done in-person at headquarters but can also be done remotely. As a global evaluation engages with colleagues from all regions, care will need to be taken to organize this meeting using a modality and timing that enables the highest level of participation. The presentation should be shared with the evaluation manager to review at least two days prior to the presentation. The evaluation manager may seek feedback from the QA2, as needed. Feedback provided by key stakeholders on the preliminary findings should be used to inform data analysis, triangulation and the formulation of findings for the evaluation report.

63. The content of the presentation should include, at a minimum:

- Background
- Purpose (evaluation objectives and uses)
- Overview of evaluation approach and methodology
- Preliminary findings and conclusions
- Next steps, including feedback loops and opportunities for engagement.

Phase 4: Reporting

The principles of independence, impartiality, credibility and utility, as well as ethics, have a number of specific implications at the reporting phase, as follows:

**Independence:** The evaluation team must be free from pressure to alter conclusions and recommendations in any way that is not supported by the evaluation's findings.

**Impartiality:** The evaluation team should analyse data and present findings transparently and reflect where different stakeholders held different views while ensuring confidentiality. The evaluation team must provide explicit rationale when they do not incorporate stakeholder feedback.

**Credibility** requires that findings are based on triangulated evidence and that clear connections are made between findings, conclusions and recommendations. Findings and conclusions must be fair and acknowledge the existence of differing views. The evaluation report explains the methodology and any limitations, and presents evidence, findings, conclusions and recommendations in a complete and balanced way.

**Utility:** A stakeholder workshop should be organized to present initial findings, conclusions and recommendations to internal stakeholders.

64. The reporting phase brings together the findings of the evaluation team in a concise analytical evaluation report. The main outputs of the reporting phase are the evaluation report and the summary evaluation report (SER).

4.1 REPORTING PHASE PROCESS GUIDE

65. The reporting phase is undertaken after the data collection phase in order to synthesize, analyse, validate and interpret all data collected. The evaluation team leader has primary responsibility for timely delivery of the evaluation report that has been quality assured internally prior to submission and that meets the Office of Evaluation quality standards. In addition, there are various levels of QA by the Office of Evaluation depending on the evaluation manager of the PE. The Head of the Global and Synthesis Unit will QA2 all policy evaluations managed by evaluation officers. For evaluations managed by senior evaluation officers, the QA2 and final approver is the Deputy Director/Director of Evaluation.

66. The evaluation team will organize a meeting of all relevant team members to analyse the data from various lines of inquiry. The evaluation manager could be invited to some or all of this meeting, as agreed between the evaluation manager and team leader.

67. Figure 6 details the necessary steps to be followed to review and finalize the evaluation report.
Figure 6: Process map for evaluation report review and finalization

- Organizes analytical meeting/workshop with relevant evaluation team members before report writing. Evaluation manager to be invited to some or all of this meeting as agreed with the team leader
- Prepares the draft evaluation report in line with EQAS standards and quality assured internally
- Submits the complete, internally quality assured, draft evaluation report to the evaluation manager by the agreed deadline.
- Reviews draft evaluation report and completes quality checklist, including inputs from the research analyst
- If the report requires major revisions: reverts to the team leader
- If the report requires minor revisions: submits to the Head of Global and Synthesis Unit or DDoE/DoE as QA2 for the second level quality assurance.
- Reviews and provides comments on the accuracy and consistency of quantitative data use and on other topics as agreed with the evaluation manager and in keeping with the research analyst’s role.
- Reviews the draft evaluation report and provides comments
- Agrees with evaluation manager on course of action: further revisions by the evaluation team or issuance of the draft report to the IRG for comments.
- Following team leader revisions, ensures quality assurance process and, once cleared by the QA2, submits to DDoE/DoE of Evaluation for approval to issue to stakeholders for comment.
- Prepares the email for the DDoE/DoE to send out the draft report to the IRG for comment.
- Circulates draft evaluation report and comments matrix to the IRG members with a minimum two-week deadline.
- Review and comment on the draft evaluation report by the deadline provided.
- Reviews comments received and discusses any critical issues with QA2
- Shares comments received with the team leader for revision
- Organizes the stakeholder workshop before the deadline for comments on the draft evaluation report.
- Organizes the comments received into ‘general’ and ‘specific’ (by paragraph) in the evaluation matrix and shares it with the evaluation manager
- Supports the organisation and conduct of the stakeholder workshop.
68. A stakeholder workshop will be held either in-person in Rome (one and a half to two days) or virtually (spread over two to three sessions) during the finalization of the report. Prior to the workshop, a draft report should be shared with a request for comments to be submitted, ideally, prior to the workshop. The evaluation manager, research analyst and the team leader should participate in the stakeholder workshop, at a minimum. The QA2 and DoE/DDoE may participate for some or all of the workshop with the DoE/DDoE invited to formally open and close the workshop. Facilitation can be done by the evaluation manager, QA2 or an externally recruited person.

69. The purpose of the workshop is to present and discuss the approach, findings, conclusions and draft recommendations with a broad range of users. The workshops should be participatory and inclusive with the aim of providing feedback on the evidence and sharpening the recommendations to ensure a high degree of utility. Time should also be given for consideration of the management response to the draft recommendations. The draft agenda and presentation should be shared with the QA2 for feedback but does not need to be submitted for formal approval.

70. **Summary evaluation report.** Once the full report has been cleared by the Deputy Director/Director of Evaluation, the evaluation manager prepares the summary evaluation report, keeping it fully aligned with the evaluation report, but placing emphasis on specific areas identified in consultation with the evaluation team leader and as important for stakeholders. The SER should follow the agreed template and meet quality standards as defined in the quality checklist. Once drafted, the evaluation manager should share it with the team leader for their review and validation. The draft SER is then submitted to the designated QA2 for feedback before being shared with the DoE/DDoE for final approval. Figure 7 provides the steps to be taken to finalise the summary evaluation report.
Figure 7: Process map for summary evaluation report review and finalization

- Prepares the draft summary evaluation report following approval of the evaluation report
- Follows template and quality checklist.

- Feedback is provided to the EM.
- If needed, the SER is revised prior to re-submission to the Deputy Director/Director of Evaluation

- Revises SER according to comments received from approver.
- Shares revised draft SER with the Team Leader for review and validation.
- Prepares the email for the draft SER to be shared with the QA2 prior to issuance to the DDoE/DoE for approval to share with the Oversight and Policy Committee (OPC) for comment.
- Reviews and clears the draft summary evaluation report to be issued to the OPC for their comments
- Circulates the draft SER to the OPC, using the email prepared by the evaluation manager
- Organises meeting with the OPC/Leadership Group to discuss evaluation findings and recommendations, as relevant

- OPC provides comments on the draft summary evaluation report (two weeks for comments)
- Unit responsible for management responses coordinates its preparation.

- Revises the SER based on comments received.
- Discusses any further changes with the Team Leader following comments from the OPC
- Any areas of disagreement with the team leader will be discussed with the QA2 and DoE/DDoE
- Finalises the SER for QA2 and DoE/DDoE review ahead of formal submission to the EB Secretariat by the OEV Communications and Knowledge Management Unit EB Focal Point
- Reviews and comments on the draft Management Response

- Reviews the revised SER prior to submission to the DoE/DDoE

- Reviews and approves the final version of summary evaluation report

- Edits the SER and shares proposed edits with the EM for review/agreement.

- Reviews edits and provides feedback to the EB Secretariat editors.
4.2 REPORTING PHASE CONTENT GUIDE AND QUALITY STANDARDS

71. The purpose of this guidance is to assist the evaluation team and the evaluation team leader in drafting the evaluation report. The latter conveys the results of the evaluation in a way that corresponds to the information needs of intended users and answers the three evaluation questions and related sub-questions. Evaluation teams have final responsibility for the content of the evaluation report.

72. Data should be presented in a clear and concise manner (in tables, diagrams, etc.) as appropriate for effective communication. They should be systematically analysed and interpreted. Findings should be evidence-based and relevant to the evaluation questions under review. The evaluators should make a clear distinction between facts borne out by evidence and assumptions or plausible associations they draw from the evidence. Conclusions should follow logically from the analysis of data and findings. The report should be balanced and impartial and use constructive language. There should be a maximum of ten recommendations (preferably fewer) and they should be relevant, realistic (implementable), prioritized and sequenced.

73. The evaluation report should specifically consider GEWE dimensions. This implies in particular ensuring that the analysis, findings, conclusions and recommendations adequately cover GEWE. In addition, a number of ethical considerations should be reviewed at the reporting stage (see Annex 3 of UNEG Ethical Guidance – Checklist of ethical issues).

74. The evaluation report should follow the Office of Evaluation template and should cover the minimum requirements as per the quality checklist.

75. The evaluation report, excluding the summary evaluation report, should not exceed 30,000 words (approximately 50 pages), and the annexes should not exceed 40,000 words. In order to minimize formatting work by the team and the Office of Evaluation, the evaluation team should adhere to the template and content guide. The report and annexes should be in compliance with the Office of Evaluation's editorial guidelines.

76. The **summary evaluation report** should not exceed 7,500 words, including 1,500 for the recommendations, and is expected to meet the standards set out in the quality checklist and to follow the template, providing high quality information in each section. The EM is responsible to provide a report in compliance with the Office of Evaluation's editorial and formatting guidelines. The QA2 carries out the quality assurance of the summary evaluation report, using the quality checklist to provide systematic and constructive feedback. Should the report require only minor revisions, “clearance to release for comments” can be sought from the Deputy Director/Director of Evaluation. Should the report require major revisions, the QA2 reverts to the evaluation manager and requests the necessary revisions before submitting the report to the Deputy Director/Director of Evaluation for approval. The draft SER is shared with the team leader for review and validation following the comments received from the OPC and prior to submission for final approval.

77. The timelines for submission of the draft summary evaluation report to the Oversight and Policy Committee have been agreed with the OPC Secretariat. They require that OPC members are given two weeks to review draft SERs.

78. Following comments submitted by members of the OPC, the EM will finalise the summary evaluation report. The steps to be taken are summarised in Figure 8.
Figure 8: Process map for summary evaluation report submission and EB session

- Submits final summary evaluation report and fully amendable and legible versions of figures and charts included in the report to the Office of Evaluation knowledge management and communication unit for sharing with the Executive Board Secretariat for editing and translation, as per Executive Board deadline, i.e. 11 weeks before the Executive Board session
- Submits the final summary evaluation report to the EB Secretariat
- Copies CPP in the transmission email to enable work on the Management Response
- Edits the summary evaluation report
- Clears edits with the evaluation manager, who consults with the Director of Evaluation
- Sends the final summary evaluation report for translation
- Reviews the edited summary evaluation report and discusses any revisions with the evaluation team leader, if necessary
- Discusses any necessary changes with the Director of Evaluation, as needed
- Clears the edited summary evaluation report for translation
- Uploads final Executive Board summary evaluation report on the Executive Board website
- Prepares talking points and powerpoint presentation for the Informal Consultation with the EB and drafts the Executive Director memorandum
- Revises talking points and powerpoint presentation and prepares memo to the Executive Director prior to the formal EB session
- Approves talking points and powerpoint presentation (normally ten working days before OPC meeting, five working days before the Executive Board informal and formal sessions)
- Oversees and coordinates the management response to the recommendations
- Following the Informal Consultation with the EB, revises talking points and powerpoint in accordance with reduced word/slide limits and finalises the ED Memo for submission to DDoE/DoE for approval ahead of the EB session
- Review and approval of revised communications pack ahead of the EB session.
### 4.3 Reference Material for the Reporting Phase

Phase 5: Follow-up and dissemination

The principles of independence and utility, as well as ethics, have a number of specific implications at the follow-up and dissemination phase, as follows:

**Independence:** All final evaluation reports, management response and PHQA results are published on WFP websites and disseminated through various channels.

**Utility:** A management response is prepared for all evaluations detailing how the evaluation recommendations will be addressed. The implementation of follow-up actions is monitored. Opportunities for wider organizational learning are pursued, including taking key discussions on evaluation results into workshops and contributing to the internal programme review and approval process.

79. It is important that evaluation reports are accessible to a wide audience, as foreseen in the WFP Evaluation Policy, to ensure the credibility and utility of evaluations through transparency. Dissemination of the reports and evidence should follow the communication and dissemination plan designed at the preparatory stage and revised if needed during the inception phase of the evaluation.

80. This section provides an overview of the final steps in the evaluation process to ensure that evaluations are accessible to the audience of WFP. Detailed guidance and communication options can be found in the communication and knowledge management plan. This section also covers some of the final administrative issues that have to be addressed by the evaluation manager. Specifically, this phase consists of the following components:

- Editing and design of full evaluation report
- Presentation to the OPC and final revisions
- Executive Board preparation and presentation
- Dissemination of evaluation products
- Archiving of closed evaluations
- Administrative completion.

5.1 FOLLOW-UP AND DISSEMINATION PHASE PROCESS GUIDE

81. The submission of the summary evaluation report to the Executive Board Secretariat and preparation for the discussion with the Executive Board signals the final steps in the evaluation process to ensure that evaluations are accessible to WFP.

82. Detailed guidance and communication options can be found in the communication and knowledge management plan. This section also covers some of the final administrative issues that have to be addressed by the evaluation manager.

83. **Report editing, formatting and web publishing.** The evaluation policy specifies that full evaluation reports are public documents available on WFPGo and WFP.org Evaluation websites. In order to publish the full evaluation report on the website ahead of the informal round table and Executive Board session and facilitate access to it, the evaluation manager is responsible for:

**SER**

- Reviewing the edited summary evaluation report and eventually clearing revisions with the team leader if/as necessary;
- Sending the Summary Evaluation Report to the Office of Evaluation knowledge management and communication unit for sharing with the Executive Board Secretariat (EBS) for editing and translation (submission to EBS 12 weeks before the EB);
• Ensuring that the final edited summary evaluation report (i.e. after editing and final approval) is copied into the full evaluation report as the executive summary.

84. The timelines for submission of the summary evaluation report have been agreed with the EB Secretariat. It is summarised in Figure 9 along with various related process steps.

**Figure 9: Timeline for Executive Board session and round table on evaluation reports preparation**

<table>
<thead>
<tr>
<th>Actions</th>
<th>Timeline (weeks before EB session)</th>

</tbody>
</table>

**ER**

• Sending the full evaluation report to the OEV knowledge management and communication unit for editing and final formatting as per corporate/Office of Evaluation standards as soon as the evaluation report has been approved by the Deputy Director/Director of Evaluation, no later than two months before the Executive Board session;

• Coordinating with the OEV communications and knowledge management unit for final editing and formatting of the full evaluation report, prior to posting on the internet and intranet;

• Submitting the edited and formatted evaluation report, including the summary evaluation report, for “final approval” of the Deputy Director/Director of Evaluation;

• Alerting the post hoc quality assessment (PHQA) coordinator that the report is ready for PHQA;

• Drafting and clearing with the Deputy Director/Director of Evaluation an introductory paragraph to the evaluation report for the WFP.org Evaluation webpage. This paragraph should not exceed 600 characters and should include a breakdown and categorization of main findings (which should not exceed seven categories).
• Reviewing the final edited and formatted version of the evaluation report and, when satisfactory, sharing it with the communications and knowledge management unit to review and publish the report and the introduction on the WFPGo and WFP.org Evaluation website and create the required links to topics and countries

• Checking that the full evaluation report and the summary evaluation report have been published on WFPGo and the WFP.org Evaluation website at least two weeks before the Executive Board session and before the informal round table.

85. **Preparation of the management response.** The evaluation policy specifies that a management response to each evaluation will be submitted to the Executive Board at the same time as the summary evaluation report. Therefore, it is important to submit the summary evaluation report on time so as to allow for timely preparation of the management response.

86. The Corporate Planning and Performance Division (CPP) is responsible for requesting and overseeing the preparation and finalization of the management response for all centralized evaluations. The preparation can begin based on the draft summary evaluation report but should be updated in case there are any changes to the recommendations during the finalization of the summary evaluation report.

**Note:** Early submission to CPP is necessary to allow for the consultation, drafting and review by concerned stakeholders of the management response, which, as an Executive Board document, is also subject to the Executive Board Secretariat deadline for editing and translation (seven weeks before the Executive Board session). To save time in the process, the evaluation manager can advise CPP of the draft recommendations, especially if only minor revisions are expected as a result of the review process.

87. **Tagging of recommendations** by theme for inclusion in the R2 system. Once the SER has been received by the EB Secretariat and the Management Response completed, CPP will contact the EM with the template to tag the evaluation recommendations according to relevant themes. This information is included in the R2 system to facilitate searching and analysis.

88. **Executive Board preparation, presentation and reporting.** In preparation for the Executive Board session, the evaluation manager will:

- Prepare talking points, PowerPoint slides, a draft 2-page Brief and a draft ED Memo for the Deputy Director/Director of Evaluation's review ahead of the Roundtable/Informal Consultation with the EB.
- Talking points and ppt should follow the word limits and templates established for Informal Consultations (e.g., evaluation description, context, key findings (mix of positive and negative), overall conclusions, lessons/key messages, and summary of recommendations).
- Following the Informal Consultation, revise the talking points and ppt to reduce their length in accordance with the standards established for the formal EB sessions and finalise the ED Memo with content related to the feedback received from member states during the Informal Consultation with the Executive Board.
- Check with the Executive Board Secretariat whether they have received any advance statements/questions from Executive Board members (to be done from around one week before the Executive Board session).
- If queries have been received from Executive Board members, draft a response and clear it with the Director/Deputy Director of Evaluation.

89. During the Executive Board session, the Deputy Director/Director of Evaluation introduces the evaluation report. Attendance by the evaluation team leader may be considered by the Deputy Director/Director on an exceptional basis, consistent with the budget and communications process planned for the evaluation in the terms of reference.
90. The evaluation manager will:

- Attend the specific informal round table and Executive Board session and know the report well enough to respond to detailed questions, if required
- Take notes of the discussion during the session and pass responses to detailed questions to the Deputy Director/Director of Evaluation as required
- Within two days of receipt, review the summary highlights (five to ten lines) of the session prepared by the Executive Board Secretariat and amend or clear them through the Deputy Director/Director of Evaluation
- Review the summary record of the session prepared by the Executive Board Secretariat and clear the revised version with the Deputy Director/Director of Evaluation
- Discuss with the Deputy Director/Director of Evaluation and Head of the communication and knowledge management unit possible follow-up to the Executive Board through communication or meetings with WFP stakeholders.

91. The DoE will request that a meeting of the Leadership Group or OPC be convened to discuss an individual evaluation report or all reports being submitted for consideration to a given EB session. The communication package prepared for the Roundtable/Informal Consultation is used to inform this discussion. Additional information may be required if an analysis of themes across evaluations is requested. **Dissemination of evaluation reports and products.** The evaluation report should be disseminated actively, including briefs to be shared with stakeholders throughout the organization, in addition to the evaluation report and the summary evaluation report.

92. The evaluation manager, supported by the research analyst, is responsible for:

- Requesting that the Office of Evaluation's communications and knowledge management unit review and publish the evaluation brief on the WFPGo and WFP.org Evaluation websites and ensure it is published at least four to six weeks before the Executive Board session
- Drafting an email to be sent out by the Director of Evaluation to share the final version of the report with the IRG and other key stakeholders four to six weeks before the Executive Board session
- Ensure implementation of the communication and knowledge management plan developed for the evaluation.

93. **Archiving of closed evaluations.** Through the evaluation process, a wide range of formal and informal outputs are created, including documents, data, communications, etc. Such products are an integral part of the evaluation process and should therefore be retained for future reference – for transparency, accountability and internal learning purposes. The Office of Evaluation's management information system on Sharepoint facilitates this.

94. The evaluation manager, with support from the research analyst is responsible for:

- Selecting files for inclusion in the system (the Word versions of the final SER and evaluation report should be uploaded)
- Delivering a fully archived evaluation, including primary data and reference library, at the end of the evaluation cycle.

95. The Office of Evaluation's evaluation information management system guidelines give details on the filing/archiving process, file structures, and roles and responsibilities.

96. **Finalization of administrative matters.** Within one month of the finalization of the evaluation report, the evaluation manager should:

- In cases where individual consultants have been hired to carry out the evaluation (not a long-term agreement firm), finalize with the Office of Evaluation's business support associate any outstanding payments by reviewing the status of travel expense claims and payments (to consultants as per attendance sheet or firms as per invoices), etc.
- Advise Head of Global and Synthesis Unit to release uncommitted funds (if any)
• In cases where individual consultants have been hired to carry out the evaluation (not a long-term agreement firm), finalize the performance assessment requirements in the Performance and Competency Enhancement system for each consultant hired directly by the Office of Evaluation.
• Complete/update management information system requirements.
