In Numbers

- **486 mt** of food assistance distributed
- **USD 1 m** of cash-based transfers made
- **USD 51.5 m** six-months (February 2022 – July 2022) net funding requirements, representing 60 % of total
- **USD 29.5 m** in Emergency Response
- **352,639 people** assisted in January 2022

Operational Updates

- In January 2022, WFP provided emergency assistance to 18,205 households (91,525 people) across two departments in Haiti (South, and Metropolitan area).

- WFP resumed its distributions in the South department, covering 13,262 households (66,310 people) for in-kind and cash distributions. Additionally, WFP was able to reach 5,434 households in the Metropolitan area.

- On 30 and 31 January 2022, heavy rain caused significant floods in the North and North-East departments. WFP is assessing the number of affected households and has in the meantime transported 1,000 ready-to-eat meals to distribute to shelters and 100 mt of in-kind food commodities that can be distributed to 1,511 households (7,555 people).

- In January 2022, WFP signed a field-level agreement for a 6-month project targeting 6 municipalities in Southern departments and one in Grand’Anse. As a result, 20,245 beneficiaries will take part in two work cycles (total of 40 days) of food for asset activities linked to water and soil conservation, as well as land and natural resource management. Participants to these activities will also benefit from technical trainings from good farming practices to product marketing and risk management.

- 2,000 families with children aged 6 to 59 months in Nippes and Grand’Anse, received 62 mt of super cereal (Corn Soya Blend) supplements through WFP’s partner SIKSE.

- In January 2022, the Home-grown School Meal Programme started in 34 schools in the earthquake affected South department thanks to a new contribution of the Governamente of France. A total of 8,000 additional schoolchildren will receive locally sourced fresh meals on a daily basis.

**Strategic Result 1:** Everyone has access to food

**Strategic Outcome 1:** Crisis-affected populations in Haiti can meet their basic food and nutrition needs in times of crisis

**Focus area:** Crisis Response

**Activities:**
- Provide emergency food assistance and support risk reduction and the recovery of crisis-affected populations

**Strategic Result 2:** Vulnerable populations in Haiti benefit from nutrition-sensitive safety nets to meet their basic needs all year

**Focus area:** Root Causes

**Activities:**
- Design, implement and strengthen nutritious-sensitive safety nets for vulnerable populations
- Provide nutritious meals and complementary sensitization and training in targeted schools relying on centralized procurement of commodities

**Strategic Result 3:** Smallholders have improved food security and nutrition through improved productivity and incomes

**Strategic Outcome 3:** Smallholder farmers and their communities in targeted areas in Haiti have improved their livelihoods to increase food security and nutrition by 2023

**Focus area:** Resilience building

**Activities:**
- Develop and improve local production by strengthening smallholder farmers’ access to markets
- Provide diversified and nutritious meals locally sourced from smallholder farmers, in targeted schools

**Strategic Result 4:** Food systems are sustainable

**Strategic Outcome 4:** Vulnerable communities in areas with fragile ecosystems can rely on resilient food systems to mitigate, adapt, and recover from shocks and manage climate-related risks by 2023

**Focus area:** Resilience building

**Activities:**
- Provide food assistance to vulnerable households for the creation and rehabilitation of assets to build resilience to shocks and introduce integrated risk management in communities exposed to climate risks

**Strategic Result 5:** Countries strengthened capacities to implement the SDGs

**Strategic Outcome 5:** Centralized and Decentralized institutions and national stakeholders increased capacities to achieve Zero Hunger by 2030

**Focus area:** Resilience building

**Activities:**
- Provide policy support and technical assistance to national stakeholders in areas of social protection, disaster risk management fortification and local production

**Strategic Result 6:** The Government and humanitarian and development actors have access to services on demand all year

**Focus area:** Resilience building

- WFP finalized its project with IMPACT initiatives through the REACH initiative, collecting data at market levels in earthquake affected areas (Sud, Nippes, and Grand’Anse).
- 1300 mt were transferred by barge to the South of the country to ensure continued distribution of food rations to the earthquake affected populations. The barge was loaded in Port-au-Prince in December and arrived in Port Saint-Louis on 11 January 2022.
- In January 2022, the United Nations Humanitarian Air Service (UNHAS) transported 1,094 passengers and 10,907 kg of cargo. WFP also continued its barge service to partners conducting around 10 voyages for the month.

**Challenges**

- Despite security issues and logistics challenges due to the shortage of fuel in the country, WFP successfully resumed its distributions in the South Department.
- In parallel, due to an increase in insecurity and the partial lift on fuel subsidies and the increase in the cost of diesel by 108 percent and gasoline by 49 percent, WFP’s operating costs are increasing.
- WFP is in urgent need of USD 6.3 million for UNHAS, and is in danger of losing one of two assets.
- The school rehabilitation project still requires USD 16 million in funding to get children back to school in earthquake affected areas.

**Donors**

Andorra, Canada, UN CERF, Education Cannot Wait, European Union, France, Germany, Greece, Haiti, Japan, Organisation Internationale de la Francophonie, Republic of South Korea, Switzerland, United Kingdom, United States, and private donors.

Additional support was provided by the Inter-American Development Bank and the World Bank.
