

## **4.5 to 90 kg PP woven bag - typical dimensions**

### **4.5 kg, 5kg bags**

- Capacity: fit to contain 4.5 to 5kg of product
- Typical size – Width: 30cm (- 5), Length Cut to Cut: 55cm, Effective length (min): 50cm.
- Typical weight 28grs/piece.

### **10 kg, 15kg bags**

- Capacity: fit to contain 10 to 15kg of product
- Typical size – Width: 40cm (- 5), Length Cut to Cut: 55cm, Effective length (min): 50cm.
- Typical weight 37grs/piece.

### **20kg, 25kg bags**

- Capacity: fit to contain 20 to 25kg of product
- Typical size (grains and pulses) – Width: 50cm (- 5), Length Cut to Cut: 80cm, Effective length (min): 75cm.
- Typical weight (grains and pulses): 68grs/piece
- Typical size (flour) – Width: 50cm (- 5), Length Cut to Cut: 85cm, Effective length (min): 80cm.
- Typical weight (flour): 72grs/piece

### **40 kg bags**

- Capacity: fit to contain 40kg of product
- Typical size (grains and pulses) – Width: 55cm (- 5), Length Cut to Cut: 95cm, Effective length (min): 90cm.
- Typical weight (grains and pulses): 89grs/piece
- Typical size (flour) – Width: 55cm (- 5), Length Cut to Cut: 100 cm, Effective length (min): 95cm.
- Typical weight (flour): 94grs/piece

### **50 kg, 60kg, 70kg bags**

- Capacity: fit to contain 50 to 70kg of product
- Typical size (grains and pulses) – Width: 60cm (- 5), Length Cut to Cut: 100cm, Effective length (min): 95cm.
- Typical weight (grains and pulses): 102 grs/piece
- Typical size (flour) – Width: 60cm (- 5), Length Cut to Cut: 110 cm, Effective length (min): 105cm.
- Typical weight (flour): 112 grs/piece

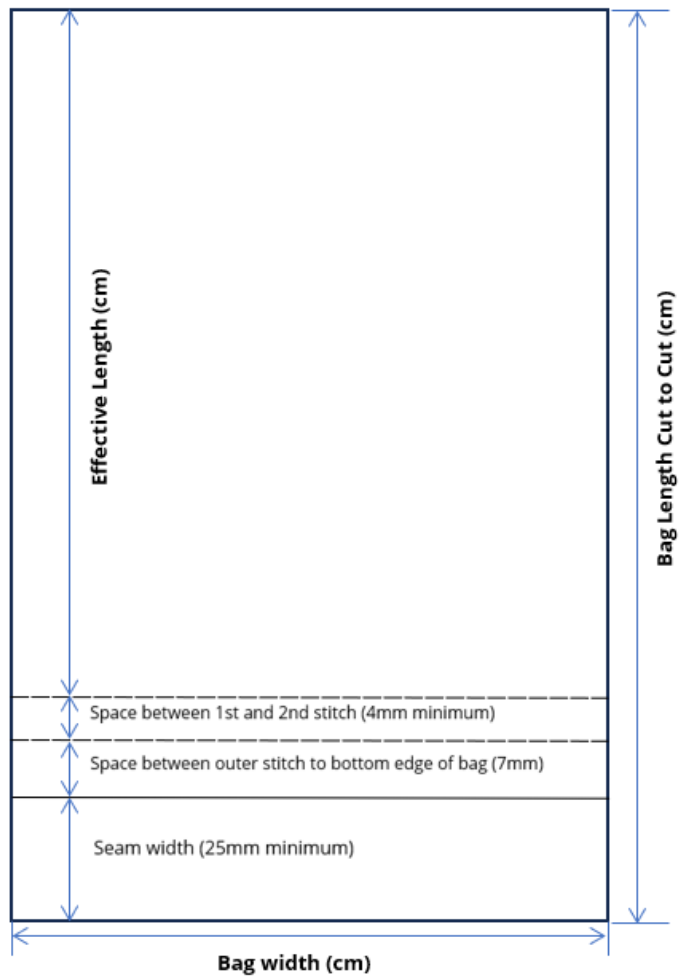

### **90 kg bags**

- Capacity: fit to contain 90kg of product
- Typical size (grains and pulses) – Width: 75cm (- 5), Length Cut to Cut: 116cm, Effective length (min): 111cm.
- Typical weight (grains and pulses): 148 grs/piece
- Typical size (flour) – Width: 75cm (- 5), Length Cut to Cut: 126 cm, Effective length (min): 121cm.
- Typical weight (flour): 161 grs/piece

**Note:** Bags can be laminated with 15 micron polypropylene and micro-perforated after consultation with packaging experts. Lamination for flour bags, require additional 20cm increase in length.

### **Terminologies**

- Length Cut to Cut: Overall bag length before folding at bottom edge and stitching.
- Effective length: Length of bag from mouth to first stitch from the top.

**Bags with folded stitching**
