

WFP Fuel Operation: WASH Sector Support

September 2021 - February 2022

KEY FIGURES

USD 4

million

received from CERF

5.3
million
litres of fuel
distributed

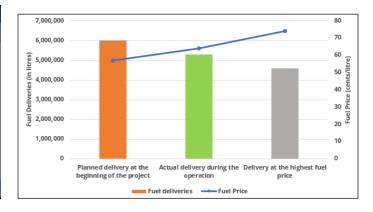

Deliveries breakdown per Governorate between September 2021 February 2022:

WASH	
Governorate	Quantity Delivered (in litres)
Akkar	261,552
North Lebanon	745,291
Baalbek El Hermel	288,885
Beirut – Mount Lebanon	2,341,476
Bekaa	533,475
South Lebanon	42,825
Nabatieh	1,078,150
Total	5,291,654

The below graph showcases the variation of fuel deliveries in-line with the increase of international fuel prices

Initially planned as a 3-month intervention beginning September 2021, WFP faced numerous challenges that necessitated the extension of the project to ensure the delivery of needed fuel quantities to targeted WASH facilities. The challenges included:

- Lack of data availability and accuracy for the identification of facilities
- Oversupply of fuel as a number of facilities were receiving diesel through sources other than WFP
- Sporadic security incidents and harsh weather conditions that hindered the delivery of fuel

WFP had initially planned to deliver a total of 6 million litres of fuel (at 57 cents/litre) to WASH facilities to ensure continuity of their operation. International fuel prices however increased between August 2021 and February 2022 from 57 cents per litre to a record high of 74 cents per litre respectively. This meant that the final distribution target had to be revised in-line with available funding resources at an average of 64 cents/litres during the intervention.

- At 57 cents/litre: possible delivery of **6 million** litres of fuel
- At 64 cents/litre: actual delivery of **5.3 million** litres of fuel
- At 74 cents/litre: possible delivery of 4.6 million litres of fuel

The below tables showcase all the WASH facilities that were served with fuel since the beginning of the fuel operation in September 2021 until February 2022:
