Operational Context

Over the last 50 years, Cuba’s comprehensive social protection
programmes have primarily eradicated poverty and hunger. Although
effective, these programmes mostly rely on food imports and strain the
national budget. Recurrent natural shocks place further challenges to food security and nutrition.

WFP accompanies the Government on its efforts to develop a
new management model to make food-based social protection
programmes more efficient and sustainable. WFP supports
social safety nets for different vulnerable groups, strengthens
agricultural value chains and promotes the improvement of
resilience and disaster risk management. These activities
contribute to Sustainable Goals 2, 5, and 17.

WFP has been working with Cuba since 1963.

Operational Updates

• WFP facilitated a learning and monitoring workshop
in the framework of the Pro-Act project which is
implemented jointly with FAO in seven municipalities
of Villa Clara province. Smallholder farmers and
national and local counterparts presented relevant
evidence of project’s impact in the resilience of the
local food system to natural disasters and climate
change. Valuable evidence such as stakeholders’
interviews and testimonies, pictures and videos were
gathered for the further systematization of project’s
best practices.

• WFP jointly with counterparts advanced in the
implementation of a project, funded by
the Korea International Cooperation Agency, for
strengthening the resilience of local food systems to
natural hazards and climate change, that are part of
social protection programmes. WFP started a training
programme and purchase process based on the main
needs identified by the benefitted institutions
(schools, community canteens, cooperatives and
suppliers).

• WFP started distributing a food basket of vegetable
oil, rice, and peas to benefit 72,000 vulnerable
people of Guantanamo, including pregnant
women and lactating girls, and elderly people. This province
is one of the most food insecure of the country. WFP
will carry out two additional food distributions in June
and September 2022.

• National authorities reported a decrease in confirmed
cases in all provinces, thanks to the vaccination
campaign that reached 100 percent of eligible Cuban
population. The provinces of Camaguey, Havana,
Mayabeque and Ciego de Avila accumulated the 50
percent of confirmed cases in the country.
WFP Country Strategy

Country Strategic Plan (2021–2024)

<table>
<thead>
<tr>
<th>Strategic Result</th>
<th>Strategic Outcome</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>1: Everyone has access to food</td>
<td>1: Populations facing multiple hazards maintain access to food during and in the aftermath of disasters.</td>
<td>1: Provide timely food assistance to shock-affected people while strengthening national and local capacity relevant to emergency preparedness and response.</td>
</tr>
<tr>
<td>2: No one suffers from malnutrition</td>
<td>2: Nutritional vulnerability has improved, an inclusive, comprehensive and adaptive food and nutrition systems by 2024.</td>
<td>2: Provide nutritious food to nutritionally vulnerable groups through social protection programmes and a social and behavioural change strategy that promotes healthy diets.</td>
</tr>
<tr>
<td>3: Food systems are sustainable</td>
<td>3: Vulnerable groups benefit from local food systems that are more resilient with regard to the impact of climate change and more efficient social safety nets by 2024.</td>
<td>3: Provide training, equipment and technical assistance to stakeholders of local food systems while ensuring a more diversified, stable and nutritious diet for school-age children and other nutritionally vulnerable groups.</td>
</tr>
<tr>
<td>4: Countries have strengthened capacity to implement the SDGs</td>
<td>4: National and local authorities have strengthened capacities to manage inclusive, comprehensive and adaptive food and nutrition systems by 2024.</td>
<td>4: Strengthen the capacity of national and local decision makers related to the management of social protection programmes and disaster and climate risk, food security and nutrition analysis and monitoring.</td>

Donors
European Union (DG-ECHO), Cuba, Germany, Italy, Switzerland, Republic of Korea (the), Russian Federation, and the Latter-day Saint Charities.

- As part of the United Nations socioeconomic response plan to COVID-19, WFP distributed milk, rice, vegetable oil and wheat flour in community canteens of the eastern provinces for 18,200 vulnerable people, mainly elders. WFP also distributed milk to 1,000 vulnerable people through social programmes of the Office of the Historian of Havana City.

Emergency Preparedness
- WFP jointly with its counterparts monitored the evolution of drought in Cuba by applying tools to mitigate the impact of the drought through risk-based early actions. These tools were developed by the project “Pon tu Ficha” implemented in the five eastern provinces and Camaguey, and the Pro-Act project implemented in the central province of Villa Clara.

Partnership
- WFP Country Director and a representative of the Ministry of Education of Cuba participated in the "IX Regional Forum of the School Feeding" in Colombia in April. New opportunities of collaboration between Cuba, WFP and other countries of the Latin American and the Caribbean region were envisaged.

Monitoring
- WFP continuously monitors the implementation of programme activities. Considering that the epidemiological situation in the country has improved, field monitors have increased their visits to institutions. In parallel, they are still using remote alternatives, in close coordination with government counterparts.

Challenges
- Cuba experienced the worst economic downturn of the last three decades as evidenced by a GDP fall of 13 percent since January 2020 until October 2021. In addition to the structural challenges, the economic and financial situation of the country has been strongly impacted by the COVID-19 and by the economic, commercial, and financial embargo imposed against it. Furthermore, the ripple effects of the Ukrainian crisis are likely to exacerbate the island's current difficulties. Venezuela's economic recession also affects the oil supply to Cuba by causing negative impacts on the industry, agriculture, energy, transport, and a lower economic output in general.
