

Highlights

- 1 Compared to the previous week, retail prices of most monitored food commodities remained stable in the majority of markets in the current reporting period with the exception of wheat flour prices, which have continued to rise in 10 markets in the range of 1%-6%. Prices of wheat flour are showing increasing trends from the middle of April after a short period of stabilization. This price increase is attributed to price increases in the producing countries and decreased imports.
- 2 Compared to the retail prices of April 2022, prices of wheat flour, vegetable oil and sugar were higher by 12%, 6%, and 3% respectively in the current reporting period. Comparing wheat flour, vegetable oil and sugar prices with the last year, their prices increased by 49%, 12% and 26% respectively.
- 3 Under seasonal factors, prices of potatoes, onions, carrots and other vegetables increased in some of the monitored markets and decreased in others. The largest increase was seen in the Bokhtar market for potatoes +17%, in the Qubodiyon market for onions +17%, in the Istaravshan market for carrots +3% and in the Gharm market for cabbages +20%.
- 4 Prices of petrol and diesel have remained stable in the majority of the monitored markets this reporting period compared to the last week. Comparing fuel prices with the last year, petrol prices increased by 26% and diesel prices by 37%.
- 5 In the last week, due to the unrest, the Khorog market was closed on 18th-19th May. On 20th May, only 10% of stalls and shops functioned within the market and in the current reporting period (23rd May), 40% of stalls and shops functioned within the market. The number of customers who visited markets were still very low. There were not any labourers in the market.

Price trend of selected commodities for 01.Jul. 2020-23.May. 2022

Selected items	Prices (Somoni)	
	23.May. 2022	01.Jul. 2020
Wheat flour (first grade)	7.4	4.9
Vegetable oil	27.1	13.1
Sugar	12.1	6.8
Petrol	11.3	5.6

About the Market Update

WFP Tajikistan, in partnership with the agricultural advisory organization Neksigol Mushovir has been monitoring commodity prices in markets across the country, especially to assess effects of COVID-19 on the population's food security situation. Markets monitored include 5 major markets and 10 minor markets. The focus is on the main commodities that are consumed by the population of the country. Prices are collected every Monday and Thursday. The price data is collected through the network of field enumerators. For each commodity, multiple traders are interviewed, and the average prices are recorded.
