In Numbers

- 204 mt of food distributed
- US$ 340,000 cash grant to HGSF schools
- US$ 275,000 six months net funding requirements (July to December 2022)
- 213,000 people assisted

Operational Context

Cambodia has achieved remarkable economic growth in the last two decades. The poverty rate has decreased from 47.8 percent in 2007 to 18.0 percent in 2019-20. The Government is committed to reaching upper middle-income status by 2030. However, a significant portion of the population remains ‘near poor’ and still at high risk of falling back into poverty following a shock. Undernutrition remains a public health concern: 32 percent of children under 5 years are stunted, 24 percent are underweight, and 10 percent wasted. Micronutrient deficiencies are widespread. Cambodia is highly vulnerable to natural disasters, with regular monsoon flooding in the Mekong and Tonle Sap basin and localised droughts in the plains. Limited access for the poor to education and health services and low levels of investment in public infrastructure further perpetuate food insecurity and undernutrition.

WFP has been present in Cambodia since 1979.

Operational Updates

School Feeding Programme

- The Ministry of Education, Youth and Sport (MoEYS) and WFP conducted a 2-day workshop to develop a monitoring and evaluation framework for the national home-grown school feeding programme, using the theory of change approach. Key stakeholders from relevant ministries jointly worked on the long-term and intermediate goals of the programme and formulated actions with measurable indicators to achieve the identified goals within the specific context of Cambodia.

- FAO and WFP, in collaboration with MoEYS, launched a project to establish nutritional guidelines and standards for school meals. The project, “School Food Nutrition Guidelines and Standards for Safeguarding Children and Adolescents’ Right to Foods” aims to strengthen in-country capacity to effectively design, implement and monitor the programme and support the integration of the guidelines and standards into national legal frameworks. A total of 40 representatives from national and sub-national government, development partners and civil society attended to share inputs and feedback on the proposed activities and approach. The project was part of a global collaboration between WFP and FAO, for which Cambodia has been selected as one of two pilot countries.

Food Security & Nutrition

- To better capture the impact of the global fuel and food crisis, WFP and the Ministry of Agriculture, Forestry and Fisheries (MAFF) expanded monthly market monitoring from 45 to 58 markets. The latest monthly update revealed that rising fuel, fertiliser and transportation costs have resulted in increasing food prices, making it difficult for the poor and vulnerable to purchase nutritious food.

**Strategic Result:** Everyone has access to food

**Strategic Outcome 1:** Vulnerable communities in Cambodia have access to nutritious, safe, diverse, convenient, affordable and preferred foods by 2025.

**Focus area:** Root Causes

**Activities:** Provide implementation support and technical assistance, including support to evidence-based policy and programme development, to national and subnational public and private sector actors engaged in social safety nets, particularly home-grown school feeding.

**Strategic Result:** Food systems are sustainable

**Strategic Outcome 2:** Poor and vulnerable communities in Cambodia are more resilient to shocks and stresses in the food system by 2023.

**Focus area:** Resilience

**Activities:** Provide technical support and backstopping to national and subnational public and private sector actors engaged in food production and transformation. (CAR: Climate adaptation and risk management activities)

**Strategic Result:** Developing countries have strengthened capacities to implement the SDGs

**Strategic Outcome 3:** National and subnational institutions have strengthened capacities to mitigate risks and lead coordinated shock preparedness and response efforts by 2025.

**Focus area:** Root Causes

**Activities:** Provide technical support and backstopping to national stakeholders engaged in shock preparedness and response mechanisms and risk informed coordination.

**Strategic Result:** Countries have strengthened capacities to implement the SDGs

**Strategic Outcome 4:** National and local governance institutions and social protection systems are better informed and strengthened toward improved services delivery by 2030.

**Focus area:** Resilience

**Activities:** Develop and integrate digital information systems and provide technical assistance in their use to government officials and their counterparts. Activities: Provide technical, coordination and organizational assistance to the Government and other food security, nutrition and social protection actors at the national and subnational levels.

**Strategic Result:** Sharing of knowledge, expertise and technology strengthen global partnership support to country efforts to achieve the SDGs

**Strategic Outcome 5:** Development and humanitarian partners in Cambodia have access to common supply chain services throughout the year.

**Focus area:** Resilience

**Activities:** Provide on-demand supply chain services to other United Nations agencies and humanitarian actors.

**Strategic Result:** Everyone has access to food

**Strategic Outcome 6:** Vulnerable people affected by crisis in Cambodia have access to nutrition-sensitive food assistance during and after the crisis.

**Focus area:** Crisis Response

**Activities:** Provide nutrition-sensitive food-/cash-based assistance to crisis-affected populations to save lives and recover livelihoods.

---

**Disaster Risk Management**

- As part of its overall effort to achieve healthy diets for all, WFP, as chair of the SUN Business Network (SBN), supported AgriHouse to conduct their second taste-testing survey to optimize the nutritional composition of snacks for school-aged children, using crickets as a source of climate-friendly protein. A total of 49 children tasted the seven snack recipes and provided feedback on the texture and flavours, allowing the company to finalize their recipes and develop the prototypes for their nutritional targets. As a winner of the WFP Innovation Challenge, the company won US$ 100,000 to develop and test a nutritious snack for school children at a price point that will be competitive against the abundance of unhealthy snacks within school premises.

**Donors**

Cambodia, European Civil Protection and Humanitarian Aid Operations (ECHO), Germany, Japan, KOICA, Private Sector Donors, Russia and USA (USDA & USAID)
