Operational Context

Uganda has a longstanding history of hosting refugees, with 1.42 million, mainly from South Sudan, Democratic Republic of Congo and Burundi currently residing in the country. Despite its agricultural potential and significant exports, Uganda’s food insecurity levels remain classified as ‘serious’ by the 2019 Global Hunger Index. Ugandans consume 400 kcal less than they need each day. Malnutrition is widespread across the country: 29 percent of children under the age of 5 years are stunted and 53 percent are anaemic and at risk of not reaching their full mental and physical potential.

WFP’s Country Strategic Plan 2018-2025 has 6 strategic outcomes and is fully aligned with national policy objectives, including Uganda’s Vision 2040 and the Third National Development Plan (NDP III). Through the CSP, WFP addresses the root causes of food insecurity and malnutrition, supports the refugee response, and strengthens social protection systems. WFP assistance is provided through direct implementation, evidence generation, knowledge sharing and capacity strengthening, while building strategic partnerships, including through South-South and Triangular Co-operation.

In Numbers

- **8311 mt** of food assistance distributed
- **USD 3.85 million** in cash-based transfers
- **USD 72 million** six months (September 2022 – February 2023) net funding requirements
- **1,652,891 people assisted** in 2022

Operational Updates

**Support to refugees**

- In August 2022, WFP provided 1.3 million beneficiaries with food assistance, distributing 7,270 mt of in-kind food and USD 3.5 million of cash-based transfers (CBT).
- In mid-2022, routine nutrition mass screenings at Nyakabande Transit Centre indicated an increase in Global Acute Malnutrition (GAM) rates over time exceeding the 15 percent threshold amidst aggravating factors. To prevent the further deterioration of the nutrition status among new arrivals, WFP continues to provide nutrition assistance through the Blanket supplementary feeding programme (BSFP). Over the month of August, there was a noted reduction in malnutrition levels.
- Phase II prioritization - which involves increasing in-kind rations from 40 percent to 60 percent ration for the most vulnerable households - continues to be implemented in the Southwest refugee settlements. The Prioritisation Core Group has approved a new structure for the appeals process, consisting of WFP and UNHCR staff. The new process will optimize the appeals process to enable timely feedback to the beneficiaries.

**Scale-up of Cash-Based Transfers (CBT):**

- The continuous scale-up of CBT is ongoing in all the 13 refugee settlements albeit on a lower scale as the transfer value is not able to meet the equivalent of the food basket due to global inflation and the increase in food prices.
- Regarding Digital Financial Inclusion, a pilot was successfully carried out with the Post Bank Agency Banking Solution to test the effectiveness of the upgraded Post Bank core banking system. The measured outcome was the ability of agents to efficiently support the households to cash-out their assistance instantly. The pilot was carried out with 200 households, each receiving Uganda Shillings 10,000 across three villages in Kyaka II Settlement. Upon completion of operational activities, distributions with the Post Bank Agency Banking solution will be executed in Kyaka II Settlement starting October 2022.

**Karamoja Lean Season Response**

- WFP continues to provide in-kind assistance under the Lean Season Response in Karamoja by implementing prevention of malnutrition activities – BSFP and the protective ration (PR) intervention. The BSFP is implemented in Kotido,

Strategic Result 1: Everyone has access to food

Strategic Outcome 1: Refugees and other crisis affected people in Uganda access adequate and nutritious food in times of crisis. Focus area: Crisis response

Activities:
- Provide food and nutrition assistance and promote financial inclusion of refugees
- Provide food and nutrition assistance to crisis-affected households

Strategic Outcome 2: Food insecure populations in areas affected by climate shocks have access to adequate and nutritious food all year. Focus area: Resilience building

Activities:
- Provide technical assistance to the Government, women and men participating in community-level asset creation projects and strengthen the national social protection system to deliver livelihood and resilience building programmes
- Provide nutritious hot meals to children attending school and technical assistance to the Government through South-South cooperation, for increased national ownership

Strategic Result 2: End malnutrition

Strategic Outcome 3: Children aged 6-59 months in food-insecure areas have acute malnutrition rates in line with national targets by 2030. Focus area: Root causes

Activities:
- Provide specialized nutritious food and nutrition-sensitive interventions to populations at risk

Strategic Result 3: Smallholder productivity and income

Strategic Outcome 4: Smallholder farmers, especially women, in targeted areas have enhanced and resilient livelihoods by 2030. Focus area: Root causes

Activities:
- Strengthen the capacity of the Government in post-harvest management and link smallholder farmers to markets

Strategic Result 4: Capacity strengthening

Strategic Outcome 5: Institutions have increased capacity to coordinate and manage food security and nutrition programmes and respond to shocks by 2030. Focus area: Root causes

Activities:
- Strengthen the capacity of selected national and subnational institutions and their underlying systems to provide direct income support
- Strengthen the capacity of selected national and subnational institutions and their underlying systems to respond to shocks

Strategic Result 5: Global partnerships

Strategic Outcome 6: Humanitarian actors have access to cost-efficient supply chain services when needed. Focus area: Crisis response

Activities:
- Provide supply chain services and expertise to enable all partners to deliver humanitarian assistance

Strategic Outcome 6: Country Strategy

Strategic Result 7: In August 2022, the Isingiro Field Office organized a meeting to share findings on the assessment of barriers to women’s economic empowerment (WEE) and digital financial inclusion (DFI) in Nakivale under the Bill and Melinda Gates Foundation project. From the findings:
  - Because of men’s greater mobility and limited care responsibilities, women and girls are perceived to have unequal access to economic opportunities compared to men
  - The majority of women’s roles in the household revolved around providing care rather than being paid, while the majority of men’s roles were linked to income generation
  - Men who had undertaken financial literacy training were supportive of women’s economic empowerment, with older men being more supportive compared to younger men.

Strategic Result 8: Strengthening national capacity for Emergency Preparedness and Response

Activities:
- In August, the PRO-ACT project continued to publish Early Warning (EW) messages and advisories. District Disaster Management Committees (DDMCs) and Subcounty Disaster Management Committees (SDMCs) continued to hold monthly coordination meetings and collate information on the state of food security and update the drought bulletins
- The PROACT continued to support the Karamoja Lean Season Response with the provision of cash-based transfers to affected communities. The PROACT project will utilise USD 635,955 of funding to provide food assistance through CBT to 164,000 people (27,000 households) for three months. The second cycle of distribution is underway

Nutrition

Activities:
- In August 2022, a total of 32,845 (22,532 children aged 6-59 months and 10,313 pregnant and lactating women) were reached with specialised nutritious foods across the nine districts in the Karamoja subregion.
- Health outreaches were integrated into CBSFP activities with the goal of providing integrated health and nutrition services. Complementary health services namely, deworming, antenatal care services, testing for HIV, and Vitamin A supplementation, were provided among others.
