

WFP Ethiopia Country Brief August 2022

World Food Programme

SAVING LIVES CHANGING LIVES

Operational Context

Ethiopia has achieved notable progress over the past decade, from economic growth averaging 10 percent per annum (2007-2017) to a reduction in extreme poverty and hunger rates by half (61 to 31 percent).

The Government's ten-year Perspective Plan (2021-2030) envisions Ethiopia becoming a middle-income country. The plan and other national policies and strategies prioritize support to the agricultural sector to enhance food and nutrition security and build resilience.

Ethiopia is experiencing prolonged drought with three consecutive poor rainy seasons, the first time in four decades. Across the Horn of Africa (Ethiopia, Somalia, Kenya) there are 20 million impacted by the drought - in Ethiopia, 7.4 million people will require food assistance.

Conflict in Northern Ethiopia has almost exhausted the coping mechanisms of millions and displaced hundreds of thousands from their homes. More than 13¹ million people require humanitarian food assistance mainly in conflict affected zones of Afar, Amhara and Tigray regions.

Population: 109 million	2020 Human Development Index: 173 out of 189
Income Level: Low	Chronic malnutrition: 38 percent of children between 6-59 months

3.6 million people assisted in August

USD 315,951 cash-based transfers provided

USD 428 million September 2022 - February 2023 net funding requirements

46,000 mt of food assistance distributed

Operational Updates

 In August, WFP provided food and nutrition assistance to 3.6 million people, including those affected by drought and floods, internally displaced persons (IDPs), refugees, and malnourished women and children.

Relief

- WFP provided food assistance to 2.09 million people, affected by drought and conflict.
- WFP dispatch of relief assistance in the Tigray Region had delays due to a lack of fuel supply. However, WFP provided food assistance to 656,791 people in need in Tigray.
- WFP also provided food and nutrition assistance to 311,765 and 325,090 food insecure internally displaced people and those in host communities in Afar and Amhara regions respectively.
- In the Somali Region, WFP continued to provide food assistance to internally displaced people and people affected by drought during the month. WFP assisted 830,357 people with 16,875 mt of food during the month.

Nutrition

 In August, WFP provided 3,252 mt of specialized nutritious foods for the treatment of moderate acute malnutrition (MAM) to 659,691 children under the age of 5, and pregnant and breastfeeding women and girls – 88 percent of its monthly target due to shortage of supplies.

Support to Refugees

 WFP supported 742,241 refugees with food assistance in 24 refugee camps across Ethiopia during the month of August. Due to funding shortfalls, WFP was only able to provide 50 percent of the standard ration.

School Feeding

 In August, WFP's school feeding programme was on hold due to school holiday closures. In preparation for the re-opening of schools at the start of the academic year, WFP completed the translation of the National School Feeding Policy from Amharic to English and developed a capacity building training to train national and regional education personnel on School Feeding.

Fresh Food Vouchers

• The Fresh Food Vouchers support households with pregnant and breastfeeding women and girls, and children under the age of two, to access fresh foods and improve their dietary diversity. During the month of August, WFP did not reach beneficiaries due to operational challenges, with 18,500 beneficiaries impacted.

Country Strategic Plan (2020 - 2025)		
Total Requirement (in USD)	Allocated Contributions (in USD)	Six Month Net Funding Requirements (in USD)
3.9 b	779 m	428 m
Strategic Result 1: Everyone has access to food		

Strategic Outcome 1: Shock-affected populations in targeted areas and refugees in camps are able to meet their basic food and nutrition needs throughout the year.

Activities:

- Provide unconditional, nutrition-sensitive, cash-based and in-kind food assistance to crisis-affected populations and transitory clients of the Productive Safety Net Programme.
- Support treatment and prevention of acute malnutrition for crisis-affected children under 5 and PLWG.
- Provide unconditional, nutrition-sensitive, cash-based and in-kind food assistance, school feeding and nutrition support to refugees.

Strategic Result 1: Everyone has access to food

Strategic Outcome 2: Vulnerable and food-insecure populations in targeted areas have increased resilience to shocks by 2025.

Activities:

- Provide safe, nutritious and reliable daily meals to primary school children and support to the Ministries and Bureaus of Education and Agriculture in scaling up nutrition-sensitive school feeding programmes.
- Provide nutrition-sensitive social protection, climate risk management services and capacity strengthening support for smallholder farmers, pastoralists, refugees and returnees most vulnerable to climate shocks.

Strategic Result 2: No one suffers from malnutrition

Strategic Outcome 3: Nutritionally vulnerable populations in targeted areas have an improved consumption of high-quality, nutrient-dense foods to prevent all forms of malnutrition through June 2025.

Activities:

• Provide climate-sensitive cash-based food transfers to PLWG and children aged 6-23 months, SBCC to communities, training to outreach workers and capacity strengthening to the private sector and Government to contribute to national and regional efforts to reduce stunting and prevent all other forms of malnutrition.

Strategic Result 5: Developing countries have strengthened capacities to implement the Sustainable Development Goals (SDGs)

Strategic Outcome 4: Federal and regional government institutions, the private sector and local NGOs benefit from capacity strengthening in the areas of early warning and emergency preparedness systems, safety nets programme design and implementation and supply chain management through June 2025.

Activities:

 Provide advisory and technical services to federal and regional government and the private sector for strengthening food assistance delivery platforms and national and regional systems, including social safety nets programme management, early warning and emergency preparedness systems, and supply chain solutions and management.

Strategic Result 8: Sharing of knowledge, expertise and technology, strengthen global partnership support to country efforts to achieve the SDGs

Strategic Outcome 5: Government, humanitarian and development partners in Ethiopia have access to and benefit from effective and cost-efficient logistics services, including air transport, common coordination platforms, improved commodity supply chains and information technology through June 2025.

Activities:

- Provide aviation and air operation services to government and humanitarian actors.
- Provide supply chain services to government and humanitarian partners.
- Provide coordination and logistics services to the humanitarian community through the Logistics Cluster.
- Provide on demand food procurement services.

Livelihood Support

To strengthen the livelihoods of communities, WFP supported 20,472 people through its resilience building and livelihood activities in the Somali and Gambella regions. In Gambella, WFP trained 155 smallholder farmers on agricultural extension packages and equipped them with airtight hermetic bags – a low-cost, post-harvest technology that reduces food losses.

Climate Risk Management

- WFP continued to implement the R4 Rural Resilience Initiative to enable vulnerable rural families to increase their food and income security by managing climate-related risks.
- WFP continued its support in Somali region, where large parts of the population depend on pastoralism. WFP provided veterinary start-up kits to 12 new community animal health workers, to motivate and boost animal health services delivery. WFP also excavated a livestock water pond with a capacity of 2400 m³ and dug a 700-metre-long canal diversion to rehabilitate 300 acres of rangeland, as part of WFP's natural resource management activities to reclaim degraded lands.

Supply Chain

- In August, WFP transported over 22,900 mt of humanitarian cargo using its own dedicated fleet trucks.
- In Amhara, WFP dispatched 500 mt of nutrition commodities across the region in August.
- In Afar, WFP dispatched 1,839 mt of Relief commodities in August.
- The Logistics Cluster provided a storage service on behalf of 20 partners and received 2,102 m³ of humanitarian cargo in August.
- The Logistics Cluster facilitated a total of 1,759 mt of humanitarian cargo to five regions. Cargo facilitated through the airlift includes 46 mt of health, nutrition, and technology items on behalf of six partners in August.

Accountability to Affected Populations

• In August, WFP continued to ensure its partners established community-based complaints feedback mechanisms (CFM) for affected populations. WFP facilitated CFM for its partners in Amhara region via suggestion boxes, interviews, telephone calls and community leaders.

United Nations Humanitarian Air Service (UNHAS)

- In August, UNHAS transported 72.1 mt of humanitarian cargo and 931 passengers within Ethiopia.
- WFP also transported 511 mt of humanitarian supplies to South Sudan from the Gambella hub.
- As of 25 August, all UNHAS flights to Tigray have been halted.

Challenges

- The resumption of conflict in Northern Ethiopia and lack of fuel, supplies and humanitarian access continued to hamper WFP's activities. WFP continues to engage and coordinate with Federal and Regional authorities to secure safe access to scale up humanitarian operations.
- WFP has the ability to save and change lives across Ethiopia through 2022, but a widening gap between resources and needs is making access to humanitarian food assistance to millions of Ethiopians uncertain. WFP has already been forced to cut rations to refugees and people affected by drought.
