\$120M

Total cash transferred via WFP's CBT platform as Service Provision

8K MT

Total actual food distributed

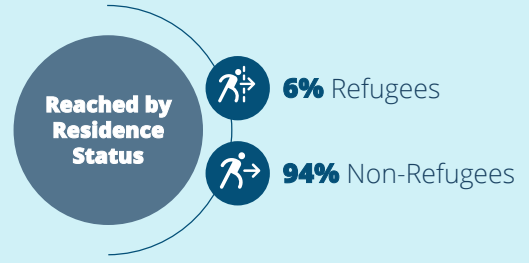

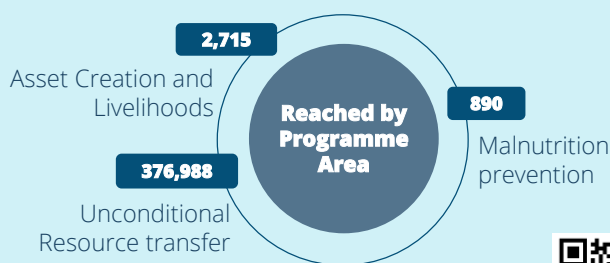

OVERVIEW

Palestine continues to face a complex protection and humanitarian crisis due to prolonged occupation, internal political divisions, and recurrent conflict. In 2022, the situation was exacerbated by heightened conflict, economic stagnation, rising food and fuel prices impacted by the conflict in Ukraine, and the lingering effects of COVID-19. With the rise in food prices significantly reducing purchasing power, 1.8 million Palestinians are now food-insecure. In 2022, WFP assisted **51 percent** of non-refugee food-insecure individuals in Palestine.

Despite funding constraints, WFP was able to maintain consistent monthly assistance to the most vulnerable and food-insecure individuals. However, WFP was unable to increase the value of cash transfers distributed, resulting in a decrease in the food consumption score for these individuals. Through expanding partnerships with national institutions, non-governmental organizations, United Nations agencies, and donor governments, WFP worked to ensure strategic alignment and operational efficiency, and enable wider reach for humanitarian and development actors in Palestine.

MEALS CONNECTING PEOPLE

The scent of pomegranate wafts from a hidden community kitchen nestled in the hills of Hebron, where a group of women gather for a weekly cooking and nutrition session facilitated by WFP. This week, they were making 'rumaniyya', a dish originating all the way from Shuja'yya in Gaza, and cooked with pomegranates, brown lentils, eggplants, garlic, olive oil, and lemon juice. – [Read more...](#)

S01
