

WFP AFGHANISTAN

2022 ANNUAL COUNTRY REPORT SUMMARY

World Food Programme

SAVING
LIVES
CHANGING
LIVES

In 2022, the people of Afghanistan faced unprecedented levels of hunger and malnutrition as opportunities for work, education and agriculture withered in the face of the economic crisis and extreme climate shocks, including deadly earthquakes, flash floods and drought. More than **20 million people experienced 'emergency' or 'crisis' levels of food insecurity**, while barely one in ten families managed to meet their most basic food needs. Women and girls were disproportionately impacted by the humanitarian crisis, made worse by severe restrictions to their basic rights and freedoms. In response, WFP drastically scaled up emergency food assistance across all 34 provinces, supporting an unprecedented 23 million people – more than half of the population.

FOOD AND NUTRITION SECURITY

22.8 MILLION PEOPLE ACUTELY FOOD INSECURE, INCLUDING 8.7 MILLION PEOPLE ON THE BRINK OF FAMINE, EXPERIENCING EMERGENCY LEVELS OF HUNGER

20,000 PEOPLE IN THE REMOTE GHOR PROVINCE EXPERIENCED FAMINE-LIKE CONDITIONS, FOLLOWING THE MOST DIFFICULT WINTER EVER RECORDED
