**POLICIES’ OBJECTIVES**

**Disaster Risk Reduction and Management (DRRM) Policy (2011)**
- Capacity strengthening for governments to respond to disaster-related food insecurity and malnutrition
- Strengthening community resilience in the face of shocks

**Climate Change Policy (2017)**
- Support scalable solutions from countries and governments to address the impacts of climate change on hunger

**KEY FINDINGS & CONCLUSIONS**

**GROWTH OF PROGRAMMES**

- DRRM and climate change interventions feature prominently in WFP country strategic plans
- The Climate Change Policy facilitated access to new funding opportunities and contributed to growth of innovative interventions

**COHERENCE**

- Greater clarity is needed on links between DRRM, climate change and resilience
- The policies are no longer aligned with latest developments in international frameworks

**SUSTAINABILITY**

- Efforts were made to promote sustainability of DRRM and climate change actions
- Sustainability prospects were stronger at community level

**GENDER AND INCLUSION**

- Attention was paid to gender equality but examples of gender transformative results are rare
- Intersectionality was not considered

**RESOURCES**

- Successful resource mobilization through climate change funding streams partly mitigated the inadequate allocation of resources

**PARTNERSHIPS**

- HQ and regional bureaux face challenges in keeping pace with country office demand

**RECOMMENDATIONS**

1. Reposition DRRM across WFP policies and guidance on resilience, climate change, emergency preparedness and risk
2. Update the climate change policy
3. Develop a costed implementation plan to roll-out the new climate change policy
4. Increase access to more diversified and multi-year funding for climate change and DRRM actions
5. Improve monitoring, evaluation and learning on climate change-related actions and DRRM
6. Ensure that sufficient staffing, capacities and skills are in place across WFP
7. Support country offices to develop a multi-risk, multi-stakeholder and locally-led DRRM strategy
8. Focus on complementarity and effectiveness in strategies and operations targeted at climate change and DRRM

**RECOMMENDATIONS**

1. Reposition DRRM across WFP policies and guidance on resilience, climate change, emergency preparedness and risk
2. Update the climate change policy
3. Develop a costed implementation plan to roll-out the new climate change policy
4. Increase access to more diversified and multi-year funding for climate change and DRRM actions
5. Improve monitoring, evaluation and learning on climate change-related actions and DRRM
6. Ensure that sufficient staffing, capacities and skills are in place across WFP
7. Support country offices to develop a multi-risk, multi-stakeholder and locally-led DRRM strategy
8. Focus on complementarity and effectiveness in strategies and operations targeted at climate change and DRRM
