Strategic Outcome 4

52% women

48% men

14,640 people participated in food assistance for assets creation activities with **US\$ 565,600** transferred to participants.

Cross-cutting results

WFP's gender awareness sessions resulted in 86 percent of men and women supported under crisis response, and 73 percent of participants in food assistance for assets creation making joint decisions on the use of cash.

WFP promoted the use of several complaints and feedback mechanisms such as a helpline, community help desk, and reporting grievances directly to community leaders.

WFP promoted clean cooking methods and piloted the use of electric pressure cookers to reduce the use of firewood and to preserve nutrients during cooking in schools.

WFP provided financial and technical support to the Disaster Management Authority to develop the Lesotho Vulnerability Assessment Committee dashboard intended to serve as the database for all vulnerability data and information to increase access to information on food and nutrition security.
