Operational Context

Guatemala is a multicultural country with 44 percent of inhabitants self-identifying as indigenous Mayan. Despite its middle-income status, two-thirds of its population live on less than USD 2 per day, and among indigenous people, poverty averages 79 percent. Guatemala has the second-highest gender inequality index in the region. Highly correlated to poverty, stunting in children aged 6-59 months is among the highest in the world and the highest in Latin America and the Caribbean. WFP assistance in Guatemala aims to achieve a sustainable improvement in food security and nutrition of the most vulnerable people. It is aligned to the National Plan, “K'atun: Our Guatemala 2032”, and the UN System and the Government’s joint and national plans to attain progress towards the Sustainable Development Goals. As Guatemala is among the countries most vulnerable to climate change and most exposed to natural hazards, WFP supports drought and flood-affected smallholder producers to help them cope with the lean, rainy and hurricane seasons, while restoring, building, and diversifying their livelihoods.

WFP has been present in Guatemala since 1974, with three field offices in Quetzaltenango, Coban and Zacapa.

In Numbers

USD 9,132 cash-based transfers made*

USD 12.3 m six months (July-December 2023) net funding requirements, representing 27 percent of total

14,450 people assisted* in JUNE 2023

*Preliminary figures

Operational Updates

- In June, due to field activity delays caused by the national elections held at the end of the month, WFP could deliver emergency food assistance to 276 beneficiaries (56 percent of women) affected by the ongoing lean season through unconditional cash-based transfers. However, WFP was able to prioritize internal capacity-strengthening initiatives such as an integrated resilience nutrition workshop for WFP staff (13 to 16 June) and a budget & programming workshop (19 to 22 June).

- WFP distributed 124 mt drought-resistant bean and corn seeds to 10,916 beneficiaries (64 percent women and girls) in its service provision activities to the Ministry of Agriculture, Livestock and Food.

- WFP assisted 6,990 people (74 percent women) in departments of Alta Verapaz, El Progreso and Zacapa. Of those, 4,220 (46 percent of the households participating in resilience interventions) were assisted by WFP’s eight Integral Brigades and 2,770 (79 percent of the households participating in resilience interventions) received capacity-building sessions on nutrition.

- In the framework of WFP’s school feeding activities, 1,724 beneficiaries (54 percent women), benefitted from capacity-building sessions on the school feeding programme, nutrition and family agriculture in Alta Verapaz, Chimaltenango, Chiquimula, El Progreso, Escuintla, Guatemala, Quetzaltenango and San Marcos.

- As part of WFP-integrated resilience activities in the departments of Chiquimula, El Progreso, Zacapa, Quiché and Alta Verapaz, 5,460 people received assistance through capacity building sessions on asset rehabilitation, market linkages, women’s empowerment, as well as Anticipatory Actions and climate services.
On 5 and 6 June, Tania Goossens, WFP Guatemala Representative, attended the EU-LAC Interregional Dialogue on food security, nutrition, and agrifood systems organized by the Spanish Agency for International Cooperation (AECID) to share WFP experience and work.

**Monitoring**

- WFP Research, Assessment and Monitoring (RAM) unit launched an interactive dashboard for food security and market monitoring, providing monthly analyses on inflation, basic food basket, food security and nutrition. The dashboard is available at [WFP Guatemala DataViz website](#).

- WFP conducted food security training for 14 cooperating partners who will implement the baseline survey for the USAID's Bureau for Humanitarian Assistance annual crisis response contribution in Jalapa and Santa Rosa, targeting 402 households affected by the lean season.

**Challenges**

- Guatemala is expected to face extended periods without rainfall from mid-2023 to early 2024 due to the El Niño phenomenon. At the same time, 1.3 million people in the Dry Corridor are acutely food insecure ([IPC 3+, June-August 2023](#)). WFP will provide emergency preparedness and response support to the Government. However, given available resources, WFP can only directly assist 67,000 people while targeting 207,000.

- Moreover, Guatemala is experiencing a spike in acute child malnutrition, with 19 deaths and 44.5 percent more cases registered this year than in 2022. Alta Verapaz, Escuintla, Guatemala City and San Marcos are the most affected. WFP is scaling up resource mobilization efforts to confirm additional integrated resilience and nutrition support to prevent and address this nutrition crisis.

**Donors**

Canada, European Union, France, Germany, Guatemala, Korea (Republic of), Switzerland, United States of America, Howard G. Buffet Foundation, Cargill and other private sector and multilateral donors.

Additional support is provided by the United Nations Peacebuilding Fund and the United Nations Joint Programme on HIV/AIDS.
