DRAFT DECISION (NOT APPLICABLE FOR EXECUTIVE DIRECTOR APPROVAL)

The Board approves the revision of the Tanzania CSP, as described in the Tanzania Country Strategic Plan and approves a corresponding increase in the country portfolio budget in the amount of **367 505 022.**

Tanzania country strategic plan, revision 02

1. RATIONALE

This revision is an expansion with no changes in Strategic outcomes nor activities but rather a change in transfer modality and increase in refugee beneficiary numbers.

The Tanzania WFP Country Strategic Plan (CSP) 2022-2027 aims at supporting the government's efforts to deliver equitable and inclusive economic growth for Tanzanians through investments in human capital, resilient livelihoods, and nutritious diets, while continuing to provide humanitarian assistance to refugees.

Increase in refugee beneficiary number: Through this Budget revision, the CSP budget will increase as a result of an increase in number of refugees under SO1/Activity 1. Due to a significant reduction in the rate of voluntary repatriation of Burundians, and an unexpected influx of Congolese asylum seekers since March 2023 fleeing a recrudescence of violence in the Kivus (13,000 new arrivals as of end September), as well as a high birth rate of 4% (equivalent to approximately 800 new borns per month), the overall in-camped refugee population has been increasing, leading to the need for this Budget revision. Congolese influx has reduced significantly since June, with a lower but constant new arrivals of approximately 20 per day; however, UNHCR expects a possible surge in arrivals towards the end of the year following elections in DRC.

Change to transfer modality: In addition, changes in the transfer modalities under SO2/Activity 3 are proposed whereby removing in-kind food and cash-based transfers modalities and related beneficiaries, and increasing capacity strengthening transfer modality. The removal of the CBT transfer modality for nutrition

support activities under SO2/Activity 3 is to ensure greater alignment with Government and donors' strategies and the recently-released World Health Organization's guidelines on the prevention and management of wasting¹. The removal of the CBT component is proposed because strengthening the Government's nutrition service delivery system through capacity building is a more sustainable approach given the lower middle income status of the country, and better aligned to the new National Multi-Sectorial Nutrition Action Plan II.

Furthermore, there will be a decrease in staffing costs as a result of the merging of two sub-offices in the Kigoma region. The closure of the office in Kibondo is part of the overall organizational re-alignment undertaken to increase value for money, following the closure of the Mtendeli camp at the end of 2021, which was overseen by the Kibondo office. The closure of the Isaka logistics office and merging with the Dodoma Liason office follows the same rationale of merging and increasing value for money of the WFP Tanzania operation.

2. CHANGES

Strategic orientation

No change in strategic orientation

Strategic outcomes

This Budget Revision allows for a change in transfer modality for nutrition activities under SO2/Activity 3: removing the in-kind and cash-based transfer (CBT) modalities, and increasing only Capacity Strengthening transfer modality in addition to an increase in the number of beneficiaries (refugees) under SO1/Activity 1.

The removal of in-kind food and CBT transfer modalities implies the removal of the corresponding Tier 1 beneficiaries for Food and CBT under SO2/Activity 3.

With Tanzania being a lower middle income country and reporting relatively low levels of wasting (3.3%)², the Country Office (CO) has been enhancing the capacity of health staff and community health workers to manage moderate wasting among children 6-59 months using nutritious local foods in place of specialised nutritious foods such as Super Cereal Plus. WFP has been complementing this with social and behaviour change activities. This is in line with Government and donors' strategies and the recently-released World Health Organization's guidelines on the prevention and management of wasting³.

The removal of the CBT component is proposed because strengthening the Government's nutrition services delivery system through capacity building is a more sustainable approach, and better aligned to the new National Multi-Sectorial Nutrition Action Plan II. Thus, the CO will focus on strengthening the capacity of Government at national and sub-national levels including community health workers (number of facilities/workers dependent on resource mobilization) to enhance the delivery of quality nutrition services for the prevention and management of malnutrition under SO2/Activity 3. Aligned with the change in modality, the CO is removing outcome and output indicators related to food and CBT and including additional Capacity Strengthening (CS) indicators.

¹ WHO. 2023. Guidelines on the prevention and management of wasting and nutritional oedema (acute malnutrition) in infants and children under 5 years.

² 2022 Tanzania Demographic and Health Survey

³ WHO. 2023. Guidelines on the prevention and management of wasting and nutritional oedema (acute malnutrition) in infants and children under 5 years.

3. COST BREAKDOWN

Main changes in costs include:

- An increase in food transfer costs and associated costs, linked to the increase in metric tons due to the increase in number of refugees beneficiaries under SO1/Activity 1;
- A decrease in food and vouchers transfer costs and associated costs linked to the removal of the food and voucher transfer modalities (and related beneficiaries) under SO2/Activity 3.
- An increase in Capacity Strengthening Transfer and associated costs under SO2/Activity 3 and SO2/Activity 4
- A decrease in Capacity Strengthening Transfer and associated costs under SO3/Activity 6 as a result of a more realistic assessment of capacity strengthening needs of food supply chain actors
- An overall decrease in staff costs due to the merging of the Kibondo and Kasulu offices and reduction in total number of staffs, as well as reduction of some Implementation costs due to the closure of two sub-offices (Kibondo and Isaka)
