Tajikistan Market Situation Update, No. 48

November 27 - December 3, 2023

Highlights

- Compared to last week, the prices of basic food products, such as first grade flour, vegetable and cotton oil, decreased by 1-3% due to an increase in their stocks on the markets. On the other hand, prices for rice and sugar increased by 1%.
- During the current week, the average price of onions decreased by 2% in most city and district markets, while the prices of potatoes, carrots and cabbage remained unchanged.
- The average price for eggs decreased by 4% over last week. and increased 3% from the last month and 38% over last vear
- Average mutton prices increase by 1% in some city and district markets, but beef, chicken and beans prices remain volatile depending on the increase or decrease in their stocks.

Petrol prices were unchanged this week compared to the last week. However, LPG and diesel prices decreased by 1-3% compared to the last week

About the Market Update

66.8 Δ3%

Δ8%

33.0

Rasht

WFP Tajikistan, in partnership with the agricultural advisory organization Neksigol Mushovir has been monitoring commodity prices in markets across the country. Markets monitored include 5 major markets and 10 minor markets. The focus is on the main commodities that are consumed by the population of the country. Prices are collected at the start of each week. The price data is collected through the network of field enumerators. For each commodity, multiple traders are interviewed, and the average prices are recorded.
