

Management Response from WFP Republic of Congo Country Office to the recommendations of the decentralized Final Evaluation of the McGovern-Dole Funded School Feeding Project in the Republic of Congo DE/CGCO/2021/001 from September 2018 to November 2023

1. This document, finalized in February 2024, presents the management response to the recommendations of the Final Evaluation of the WFP McGovern-Dole Funded School Feeding Project in the Republic of Congo
2. The evaluation, which WFP Republic of Congo commissioned, covers McGovern-Dole outputs and outcomes and assesses whether the baseline and mid-term recommendations have been actioned and integrated into project implementation and, if so, whether these baseline and mid-term recommendations were successful in strengthening project implementation. The evaluation serves the dual purpose of accountability and learning and informs the progress made so far towards achieving results, compared with the baseline and mid-term and also looks at why certain results were achieved or not. It will draw lessons, derive good practices and pointers for learning. The purpose is to inform operational and strategic decision-making, including any course correction measures required by WFP.
3. The evaluation made six (6) key recommendations with twenty-three (23) actions. The matrix sets out whether WFP agrees, partially agrees, or disagrees with the recommendations and sub-recommendations. It presents the planned (or taken) actions, responsibilities and timelines.
